

Nippon India Mutual Fund – Nippon India ETF offerings

December 2024

Data as on December 31, 2024

What is an EXCHANGE TRADED FUND (ETF)?

An ETF is a MF Scheme or security that endeavors to replicate the value of an underlying i.e index or a commodity & listed on the exchange

About Exchange Traded Funds (ETFs)

ETFs are simple to understand and are transparent to track

Can be bought / sold like any other stock on the exchange (Where the scheme is listed) through terminals

Generally less expensive than investing in multiple individual securities.

Can be bought / sold anytime during market hours at real-time prices instead of end-of-day prices

Benefits of investing in ETFs – Key Highlights

Liquidity Management

- ETFs can be used to provide a liquidity buffer across the asset allocation.#

Portfolio Completion

- ETFs allow investors to gain exposure to an asset class that may be underrepresented in the asset allocation of investor's portfolio.

Cash Equitization

- ETFs assist in remaining fully invested while maintaining liquidity, thus minimizing the cash drag effect on the portfolio.

Portfolio Transitions

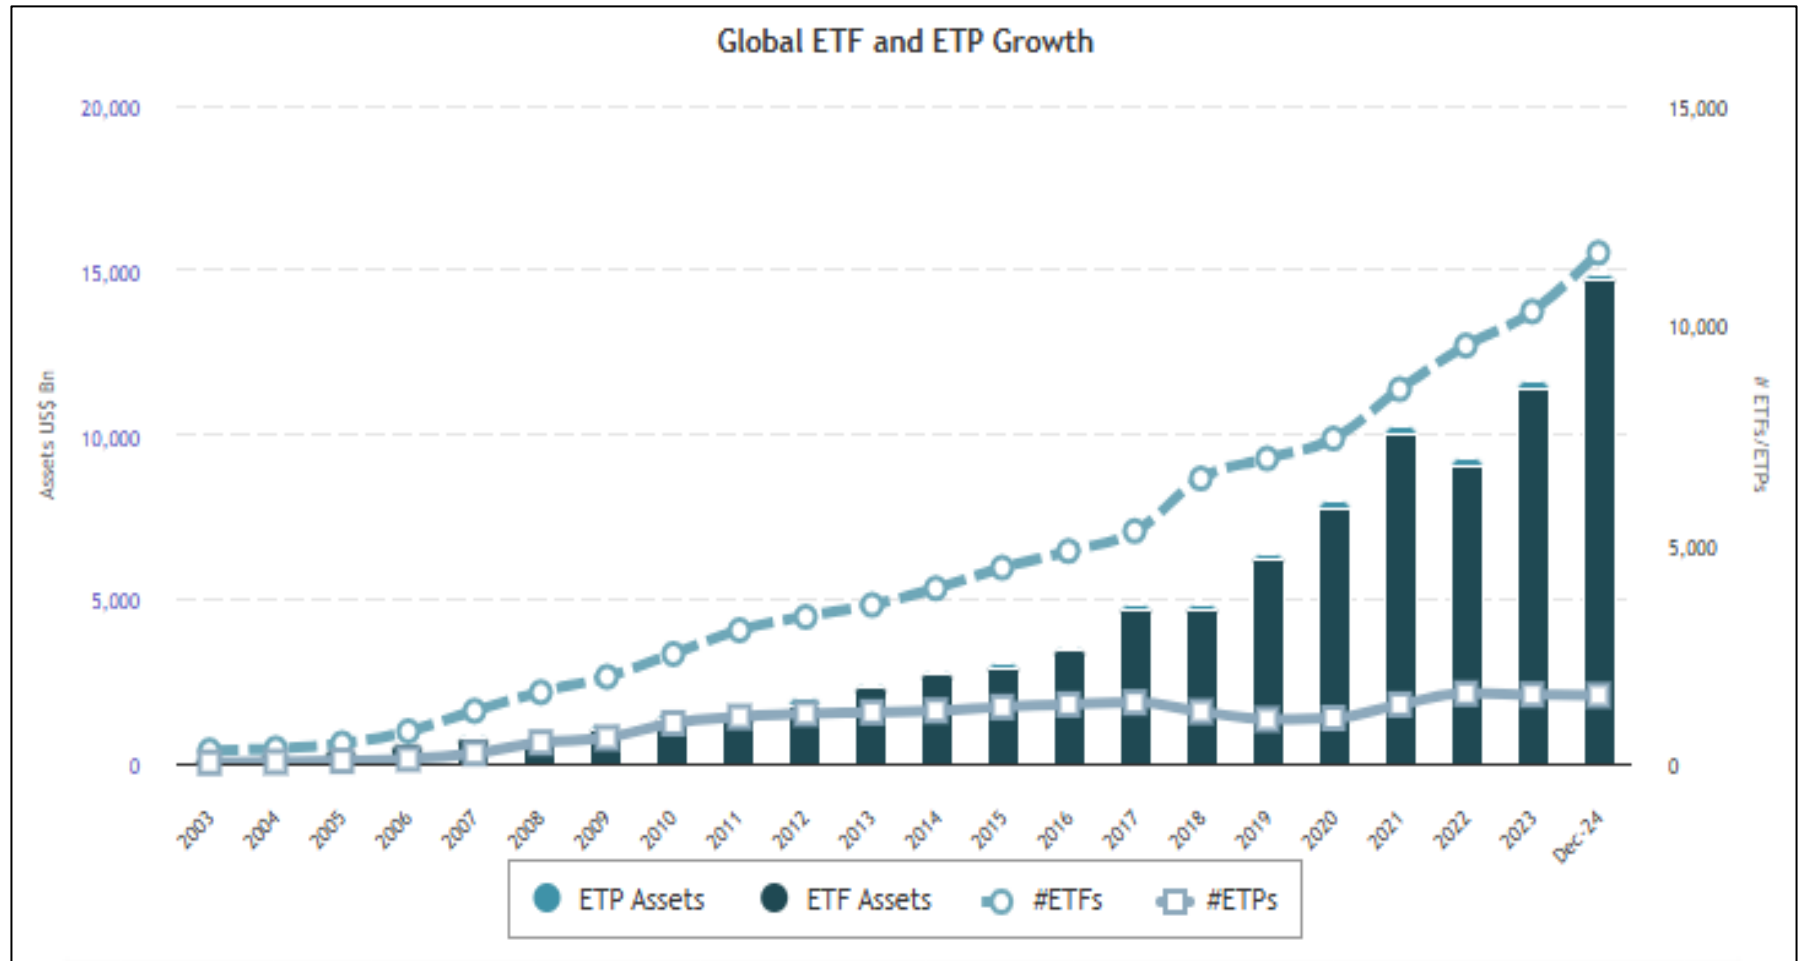

- Since ETFs are passive funds which may help to maintain market exposure while there are changes in sector/stock allocations in a portfolio, it avoids the risk of missing any market movement.

#Subject to the market condition and availability of spread and liquidity

An Open Ended Index Exchange Traded Scheme

• Investment Objective

The investment objective of the Scheme is to provide returns that, before expenses, closely correspond to the total returns of the Securities as represented by the Nifty CPSE Index, by investing in the Securities which are constituents of the Nifty CPSE Index in the same proportion as in the Index.

However, the performance of the Scheme may differ from that of underlying index due to tracking error. There can be no assurance or guarantee that the investment objective of the Scheme would be achieved.

• About the Benchmark: Nifty CPSE Index

Nifty CPSE Index is constructed in order to facilitate Government of India's initiative to disinvest some of its stake in selected CPSEs. The government opted for ETF route for disinvestment. The ETF shall track the performance of the Nifty CPSE Index. The index values are to be calculated on free float market capitalization methodology. The index has base date of 01-Jan-2009 and base value of 1000.

Note: The performance of the scheme is benchmarked to the Total Return variant of the Index.

Disclaimer

- **Risk Factors:** Trading volumes and settlement periods may restrict liquidity in equity and debt investments. Investment in Debt is subject to price, credit, and interest rate risk. The NAV of the Scheme may be affected, inter alia, by changes in the market conditions, interest rates, trading volumes, settlement periods and transfer procedures. The NAV may also be subjected to risk associated with tracking error, investment in derivatives or script lending as may be permissible by the Scheme Information Document. Past performance may or may not be sustained in future.
- **BSE Disclaimer:** It is to be distinctly understood that the permission given by BSE Ltd. should not in any ways be deemed or construed that the SID has been cleared or approved by BSE Ltd. nor does it certify the correctness or completeness of any of the contents of the SID. The investors are advised to refer to the SID for the full text of the Disclaimer clause of the BSE Ltd.
- **NSE Disclaimer:** It is to be distinctly understood that the permission given by NSE should not in any way be deemed or construed that the Scheme Information Document has been cleared or approved by NSE nor does it certify the correctness or completeness of any of the contents of the Draft Scheme Information Document. The investors are advised to refer to the Scheme Information Document for the full text of the Disclaimer Clause of NSE
