

# **Nippon India Mutual Fund – Nippon India ETF offerings**

January 2024

Data as on January 31, 2024

# What is an EXCHANGE TRADED FUND (ETF)?

**An ETF is a MF Scheme or security that endeavors to replicate the value of an underlying i.e index or a commodity & listed on the exchange**

# About Exchange Traded Funds (ETFs)

ETFs are simple to understand and are transparent to track

Can be bought / sold like any other stock on the exchange (Where the scheme is listed ) through terminals

Generally less expensive than investing in multiple individual securities.

Can be bought / sold anytime during market hours at real-time prices instead of end-of-day prices

# Benefits of investing in ETFs – Key Highlights

## Liquidity Management

- ETFs can be used to provide a liquidity buffer across the asset allocation.#

## Portfolio Completion

- ETFs allow investors to gain exposure to an asset class that may be underrepresented in the asset allocation of investor's portfolio.

## Cash Equitization

- ETFs assist in remaining fully invested while maintaining liquidity, thus minimizing the cash drag effect on the portfolio.

## Portfolio Transitions

- Since ETFs are passive funds which may help to maintain market exposure while there are changes in sector/stock allocations in a portfolio, it avoids the risk of missing any market movement.

#Subject to the market condition and availability of spread and liquidity

# **Exchange Traded Funds (ETFs)**
