# Rationale for Dynamic Asset Allocation Funds

Equities, one of the Best Asset Classes for Long Term Wealth Creation

## S&P BSE Sensex

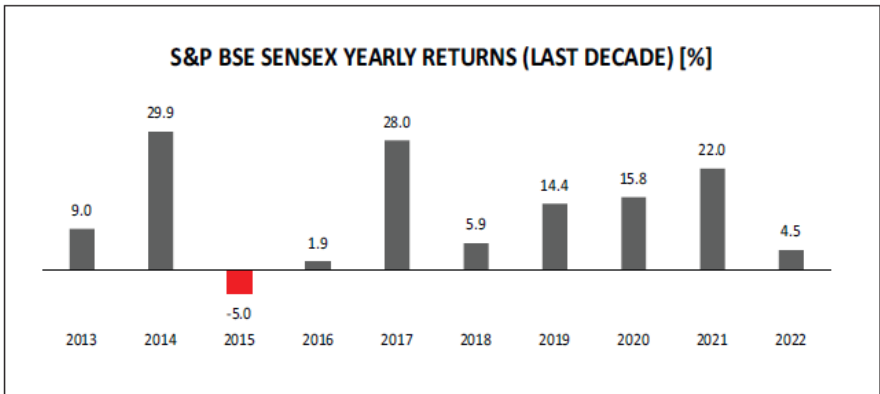

Rs 5.7 Crs as of Nov 30, 2023

Rs 1 lakh invested in S&P BSE Sensex on Jan 1, 1980 would have grown to Rs 5.7 crs as of November 30, 2023

..... But Equity returns can be unpredictable and volatile

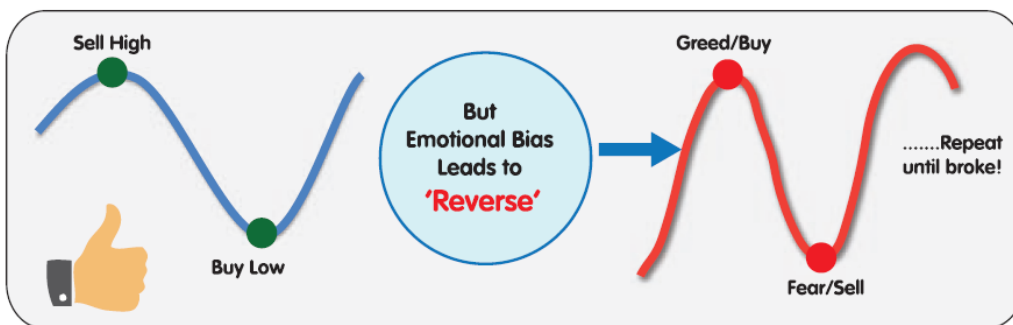

Over the last decade 40% of the calendar years S&P BSE SENSEX delivered less than 10% returns.

Common Source: Bloomberg

This illustration should not be construed as a promise, guarantee on or a forecast of any minimum returns and should not in any way construed to returns of any of Nippon India Mutual Fund Scheme. Past performance may or may not be sustained in future and the same may not necessarily provide the basis for comparison with other investment.

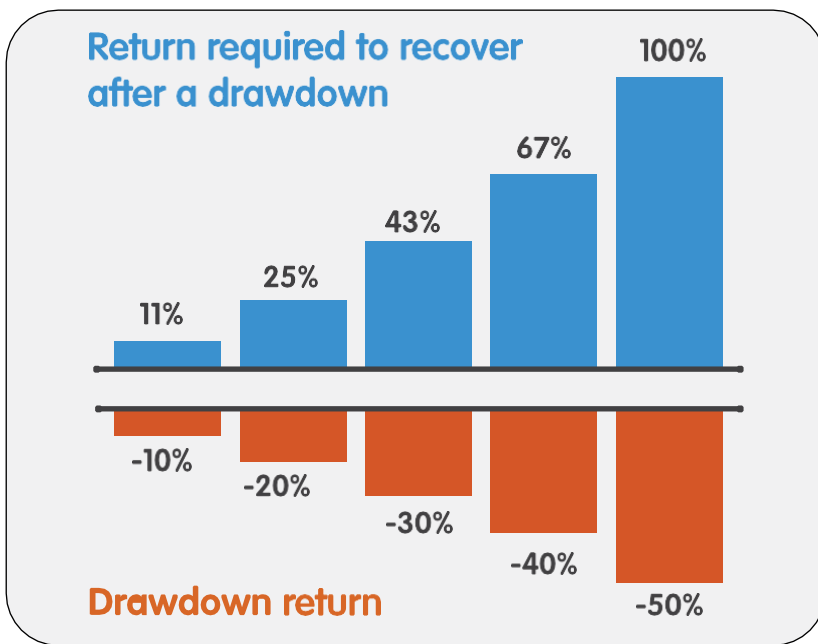

However, one can make volatility their friend and benefit by:

### 1. Avoiding Emotional Bias

Resulting in Lower Investor Returns – 'Behaviour GAP' 'As the investor attempts to time the markets'

## 2. Lowering Downside Risk

If an investment of Rs 100 becomes Rs 50, it's a 50% Decline but for the Rs 50 to become Rs 100 again requires a 100% GAIN

This is only for illustration purpose.

Hence Losing Less is also equally important criteria for Long Term Wealth Creation

## 3. Aim to gain from growth potential of Equity

Our Solution aims to benefit from equity growth potential with lower volatility through hedging strategies

### Presenting Nippon India Balanced Advantage Fund

A model based Dynamic Asset Allocation Fund that aims to offer Triple Benefits of

1. Emotion Free Asset Allocation – Model Based Asset Allocation
2. Lowers Downside Risk – Through Hedging
3. Long Term Alpha – through Active Stock selection and Sector

### Asset Allocation Strategy

Asset allocation is based on in-house proprietary model which takes into consideration fundamental, technical and macro parameters.

- **Valuations:** Valuations are fulcrum of the model.
  - The model uses 1 year forward P/E of MSCI India Index.
  - The model also include the equity risk premium which gives an insight as to how rewarding or unattractive equities are versus interest rates.
- **Trend following/momentum:** This is a unique parameter which aids in maximizing Upside Potential and Limiting downside
- **Trade weighted US Dollar:** A strong Dollar typically coincides with weaker phases of Equity prices, while a weaker Dollar coincides with strong equity performance
- **Global Demand Indicators:** A combination of Lumber/Copper/Nickel prices acts as a strong indicator of global economy and markets.

### Fund Strategy

- Core asset allocation through: Valuations, trend following, trade weighted US Dollar and global demand indicators
- Model based portfolio rebalancing on a daily basis
- Investment Universe: All listed large and midcap stocks which have derivatives.
- Large cap oriented portfolio
- Well diversified portfolio across stocks and sectors.
- Debt exposure: Debt portfolio will be conservative focused on the shorter end. It will be combination of liquid and short term fixed income securities.

### Investment Rationale

- Nippon India Balanced Advantage Fund aims to deliver risk adjusted returns across market cycles
- Model Based Asset Allocation aims to minimize 'Emotional Bias' and helps in implementing 'Buy on Lows & Sell on Highs'
- Active equity stock selection to aid in differential returns
- 'Alpha Potential' in full market cycle through:
  - Downside Risk Management in Falling Markets
  - Upside participation in Rising Markets

**Disclaimer pertaining to Income Distribution Cum Capital Withdrawal (IDCW) History:** Past performance may or may not be sustained in the future. IDCW distribution is subject to availability & adequacy of distributable surplus. The Mutual Fund is not assuring that it will make periodical IDCW distributions, though it has every intention of doing so. After the payment of IDCW, the per unit NAV falls to the extent of the IDCW payout and distribution taxes, if any. Performance of IDCW plan/option would be net of applicable statutory levy, if any. Face value of Rs.10. \* NAV on the 1st transaction day after Record Date, which includes the mark to market impact also. The above table provides details of Income Distribution cum Capital Withdrawal Plan (IDCW Plan) (Regular Plan).

Stamp duty @ 0.005% of the transaction value would be levied on applicable mutual fund transactions, with effect from July 01, 2020. Accordingly, pursuant to levy of stamp duty, the number of units allotted on purchase/switch-in transactions (including IDCW reinvestment) to the unitholders would be reduced to that extent. Kindly refer notice cum addendum no. 30, dated June 30, 2020.

---

**Risk factor & Disclaimer:** Trading volumes and settlement periods may restrict liquidity in equity and debt investments. Investment in Debt is subject to price, credit, and interest rate risk. The NAV of the Scheme may be affected, inter alia, by changes in the market conditions, interest rates, trading volumes, settlement periods and transfer procedures. The NAV may also be subjected to risk associated with investment in derivatives, foreign securities or script lending as may be permissible by the Scheme Information Document. For further details, please refer Scheme Information Document (SID).
