Nippon Life India Asset Management Limited (NAM India) is one of the largest asset managers with more than 29 years of experience in managing wealth of investors with a robust distribution network in India.

To cater to the increasing demand for passive management, we offer a variety of Exchange Traded Funds (ETFs) under “Nippon India ETFs”. Currently, we offer eighteen equity ETFs – benchmarked against Nifty Bank TRI, Nifty 100 TRI, Nifty 50 TRI, Nifty Midcap 150 TRI, Nifty India Consumption TRI, Nifty Dividend Opportunities 50 TRI, Nifty 50 Value 20 TRI, Nifty Next 50 TRI, Nifty Infrastructure TRI, Nifty50 Shariah TRI, Nifty PSU bank TRI, Nifty CPSE TRI, Nifty IT TRI, Nifty Pharma TRI, Hang Seng TRI, BSE Sensex TRI, BSE Sensex Next 50 TRI & Nifty Auto TRI ; four debt ETFs – benchmarked against Nifty 8-13 yr G- Sec Index, Nifty SDL Apr 2026 Top 20 Equal Weight Index, Nifty 5 Yr Benchmark G-Sec Index & Liquid ETF in money market space and two commodity ETFs – based on domestic prices of Gold and Silver.

Why Equity ETF?

- ▶ **Ease of transaction** - Can be easily bought / sold like any other stock on the exchange through terminals spread across the country
- ▶ **Ease of Liquidity** - Can be bought / sold anytime during market hours (subject to availability of buyer/seller) at prices prevailing in the market. Thus, investor transacts at real-time prices.
- ▶ **Low Cost** - Generally less expensive than investing in multiple individual securities.
- ▶ **Other Special Features**
 - Instant diversification through exposure to a large number of stocks by purchasing as low as 1 unit
 - Buying / selling at close to live price and not end-of-day, also ability to put limit orders
 - Authorised Participants / Large investors can buy directly from the AMC at Live Prices in creation unit sizes[^]

Strategies used through Index based Equity ETFs

- ▶ **Liquidity Management** - ETFs can be used for a given percentage of each asset class to provide a liquidity buffer across the asset allocation
- ▶ **Portfolio Completion** - ETFs allow investors to gain exposure to an asset class that is under-represented in the asset allocation
- ▶ **Cash Equitization** - ETFs assist in remaining fully invested into equity as per the allocation model, while maintaining liquidity, thus minimizing the cash drag effect on the portfolio
- ▶ **Portfolio Transitions** - Since ETFs are passive funds, they may help maintain market exposure while there are changes in sector/stock allocations in a portfolio, hence avoids the risk of missing any market movement

Transaction Options available for investors

Subscription	Process	Features
Through Stock Exchange	Online Terminal / Stock Broker	<ul style="list-style-type: none"> • Can trade as less as 1 Unit • Unit credit on T+1 • Transaction on Exchange traded price • No paperwork • Transaction on order matching and availability of quotes
Through AMC (Authorized Participants & Large Investors)	Transaction form with requisite documents	<ul style="list-style-type: none"> • Can transact in multiples of creation unit size[^] • Transaction in exchange of Portfolio deposit & Cash Component
Redemption	Process	Features
Through Stock Exchange	Online terminal / Stock Broker	<ul style="list-style-type: none"> • Can trade as less as 1 Unit • Amount credited T+1
Through AMC (Authorized Participants & Large Investors)	Redemption Request	<ul style="list-style-type: none"> • Can trade in multiples of creation unit size[^] • Transaction in exchange of Portfolio deposit & Cash Component

Creation Unit Size

Creation Unit size is the minimum denomination of unit that can be directly purchased/redeemed from AMC

Tradable Unit	Composition	Creation Unit Size [^]	NAV Value (Rs.)*	Approx. Basket Value (Rs.)*
1 Unit Nippon India ETF BSE Sensex	~ 1/100 of BSE Sensex Index	10,000 units of Nippon India ETF BSE Sensex	874.6337	87,46,337

*Data as of 31st January, 2025 taken as reference value

Importance of Creation Unit Size

- In case of non-availability of sizeable quote, Investors can transact with the AMC in creation unit lots[^]
- Investors can transact both in form of cash or stock basket comprising the index
- Units are created at live NAV price plus expenses

Nippon India ETF BSE Sensex

About Nippon India ETF BSE Sensex

- Nippon India ETF BSE Sensex is an Exchange Traded Fund (ETF) listed on BSE
- Nippon India ETF BSE Sensex invests into BSE Sensex Index companies only, in the same proportion as the underlying index
- The BSE SENSEX is the oldest and one of the most prominent broad based benchmark in India & was launched in January 1986.
- Base date 3-Apr-1979, the index has a track record of around 43 years

Source: www.bseindia.com, AIPL

Investment Objective : Nippon India ETF BSE Sensex

The investment objective of the scheme is to provide investment returns closely corresponding to the total returns of the securities as represented by the BSE Sensex Index before expenses, subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme will be achieved.

Positioning – Nippon India ETF BSE Sensex

- It allows investors to take part in India growth story by essentially investing through India's one of the oldest and one of the most prominent benchmark in India
- The index is designed to serve as both a benchmark and an investable index and is comprised of 30 constituent stocks representing large, relatively well-established companies across key sectors
- Investments in Nippon India ETF BSE Sensex can form part of "core equity portfolio", especially for HNI & Institutional investors
- Relatively Low cost ETF – beneficial for all type of investors
- By investing in Nippon India ETF BSE Sensex, strategies like "cash equitization" can be effectively deployed because of its inherent advantages like one of the best market representation, lower cost etc

Benefits of Nippon India ETF BSE Sensex

- ▶ **Low Expense:** ETF, being index linked exchange traded fund, has relatively lower expense ratio than other equity schemes, thereby giving the client a low cost exposure to the indices.
- ▶ **Liquidity:** Apart from being readily available for trade on the recognized stock exchanges, ETF units can also be bought in creation units size[^] by large investors directly from the asset management company.
- ▶ **Less of Ambiguity:** The ETF's investment strategy & stock selection is clearly defined, holding stocks as per the underlying Index in the same weightages
- ▶ **Diversification:** Buying a single unit will offer diversification benefit in the entire index companies
- ▶ **Transparency:** The index constituents are available in the public domain on a daily basis by BSE

About BSE Sensex Index

Eligible Universe:

The index is derived from the constituents of the BSE 100. The inclusion of DVRs in the index will result in more than 30 stocks in the index. However, the number of companies in the index remains fixed at 30. Stocks in the eligible universe must satisfy the following eligibility factors in order to be considered for index inclusion:

- Listing History: Stocks must have a listing history of at least six months at BSE.
- Trading Days: The stock must have traded on every trading day at BSE during the six month reference period.
- Multiple Share Classes: DVRs satisfying the above eligibility criteria are aggregated with the company's common stock and index construction is done based on the aggregated company data as detailed below.

Index Construction:

1. All companies meeting the eligibility factors are ranked based on their average six month float adjusted market capitalization. The top 75 are identified.
2. All companies meeting the eligibility factors are ranked again based on their average six month total market capitalization. The top 75 are identified.
3. All companies identified based on steps 1 and 2 are then combined and sorted based on their annualized traded value. Companies with a cumulative annualized traded value greater than 98% are excluded.
4. The remaining companies are then sorted by average six-month float-adjusted market capitalization. Companies with a weight of less than 0.5% are excluded.
5. The remaining companies from step 4 are then ranked based on their average six-month float adjusted market capitalization, and are selected for index inclusion according to the following rules:
 - a) The top 21 companies (whether a current index constituent or not) are selected for index inclusion with no sector consideration.
 - b) Existing constituents ranked 22 – 39 are selected in order of highest rank until the target constituent count of 30 is reached.
 - c) If after this step the target constituent count is not achieved, then non-constituents ranked 22 – 30 are selected by giving preference to those companies whose common India Industry Classification Structure macro-economic indicator is underrepresented in the index as compared to the macro-economic indicator representation in the BSE AllCap.

- d) If after this step, the target constituent count is still not achieved, non-constituents are selected in order of highest rank until the target constituent count is reached.

Annualized traded value is calculated by taking the median of the monthly medians of the daily traded values over the six-month period. The annualization is calculated using 250 trading days in a year.

All additions and deletions are made at the discretion of index committee.

Constituent Weightings: Index constituents are weighted based on their float-adjusted market capitalization.

Performance as on 31st January, 2025

B: Benchmark, AB: Additional Benchmark, TRI: Total Return Index

TRI - Total Returns Index reflects the returns on the index arising from (a) constituent stock price movements and (b) dividend receipts from constituent index stocks, thereby showing a true picture of returns.

For Exchange Traded Funds of Nippon India Mutual Fund, performance is provided at Scheme level using IDCW Reinvestment NAV's, since there are no separate plan/option under such Schemes.

Period for which scheme's performance has been provided is computed basis last day of the month-end preceding the date of advertisement.

Past performance may or may not be sustained in future and the same may not necessarily provide the basis for comparison with other investment. Performance of the schemes (wherever provided) are calculated basis CAGR for the past 1 year, 3 years, 5 years and since inception. IDCWs (if any) are assumed to be reinvested at the prevailing NAV. Performance of the scheme would be Net of Dividend distribution tax, if any. Face value of scheme is Rs.10/- per unit. In case, the start/end date of the concerned period is non-business day (NBD), the NAV of the previous date is considered for computation of returns.

Finance Act 2020 has abolished dividend distribution tax on IDCW declared and paid by Mutual Fund scheme. W.e.f. 01.04.2020 IDCW received from Mutual fund scheme is taxable in the hands of investor and mutual fund scheme is required to withhold tax on IDCW as per applicable rate.

Performance of other open ended schemes managed by the same fund manager as on 31st January, 2025
