Strategies used through Index based Equity ETFs

- ▶ **Liquidity Management** - ETFs can be used for a given percentage of each asset class to provide a liquidity buffer across the asset allocation
- ▶ **Portfolio Completion** - ETFs allow investors to gain exposure to an asset class that is under-represented in the asset allocation
- ▶ **Cash Equitization** - ETFs assist in remaining fully invested into equity as per the allocation model, while maintaining liquidity, thus minimizing the cash drag effect on the portfolio
- ▶ **Portfolio Transitions** - Since ETFs are passive funds, they may help to maintain market exposure while there are changes in sector/ stock allocations in a portfolio, hence avoids the risk of missing any market movement

About BSE SENSEX Next 50 Index

BSE SENSEX Next 50 Index was launched on February 27, 2017 (Base date December 16, 2005) with a base value as 7000.

Eligible Universe:

The index measures the performance of 50 companies within BSE 100 that are not members of the BSE SENSEX 50.

Index Construction:

All constituents of the BSE 100 that are not members of the BSE SENSEX 50 are selected and form the index, subject to the following derivative market linkage constraints:

- The individual float-adjusted weight of any share class of a company not linked to derivatives trading cannot exceed 5% of the index.
- The aggregate float-adjusted weight of the index constituents not linked to derivatives trading cannot exceed 20%.

If any of the above derivative market linkage constraints are violated, the lowest-ranked company not linked to derivatives trading is removed and replaced with the highest-ranked eligible company linked to derivatives trading. This process is repeated until the aggregate weight of the index constituents not linked to derivatives trading no longer violates the constraints outlined above.

Constituent Weightings:

Index constituents are weighted based on their float-adjusted market capitalization.

Index Rebalancing:

Index rebalancing occurs on semi-annual basis in the months of June & December.
