- ▶ **Portfolio Completion** - ETFs allow investors to gain exposure to an asset class that is under-represented in the asset allocation
- ▶ **Cash Equitization** - ETFs assist in remaining fully invested into equity as per the allocation model, while maintaining liquidity, thus minimizing the cash drag effect on the portfolio
- ▶ **Portfolio Transitions** - Since ETFs are passive funds, they may help maintain market exposure while there are changes in sector/stock allocations in a portfolio, hence avoids the risk of missing any market movement
