Nippon Life India Asset Management Limited (NAM India) is one of the largest asset managers with more than 28 years of experience in managing wealth of investors with a robust distribution network in India and.

To cater to the increasing demand for passive management, we offer a variety of Exchange Traded Funds (ETFs) under "Nippon India ETFs". Currently, we offer eighteen equity ETF's – benchmarked against Nifty Bank TRI, Nifty 100 TRI, Nifty 50 TRI, Nifty Midcap 150 TRI, Nifty India Consumption TRI, Nifty Dividend Opportunities 50 TRI, Nifty 50 Value 20 TRI, Nifty Next 50 TRI, Nifty Infrastructure TRI, Nifty50 Shariah TRI, Nifty PSU bank TRI, Nifty CPSE TRI, Nifty IT TRI, Nifty Pharma TRI, Hang Seng TRI, BSE Sensex TRI, BSE Sensex Next 50 TRI & Nifty Auto TRI; four debt ETFs – benchmarked against Nifty 8-13 yr G- Sec Index, Nifty SDL Apr 2026 Top 20 Equal Weight Index, Nifty 5 Yr Benchmark G-Sec Index & Liquid ETF in money market space and two commodity ETF's – based on domestic prices of Gold and Silver.

Why Equity ETF?

- ▶ **Ease of transaction** - Can be easily bought / sold like any other stock on the exchange through terminals spread across the country
- ▶ **Ease of Liquidity** - Can be bought / sold anytime during market hours (subject to availability of buyer/seller) at prices prevailing in the market. Thus, investor transacts at real-time prices.
- ▶ **Low Cost** - Generally less expensive than investing in multiple individual securities
- ▶ **Other Special Features**
 - Instant diversification through exposure to a large number of stocks by purchasing as low as 1 unit
 - Buying / selling at close to live price and not end-of-day, also ability to put limit orders
 - Authorised Participants/ Market Makers/ Large investors can buy directly from the AMC at Live Prices in creation unit sizes[^]

Strategies used through Index based Equity ETFs

- ▶ **Liquidity Management** - ETFs can be used for a given percentage of each asset class to provide a liquidity buffer across the asset allocation
- ▶ **Portfolio Completion** - ETFs allow investors to gain exposure to an asset class that is under-represented in the asset allocation
- ▶ **Cash Equitization** - ETFs assist in remaining fully invested into equity as per the allocation model, while maintaining liquidity, thus minimizing the cash drag effect on the portfolio
- ▶ **Portfolio Transitions** - Since ETFs are passive funds, they may help maintain market exposure while there are changes in sector/stock allocations in a portfolio, hence avoids the risk of missing any market movement

Transaction Options available for investors

Subscription	Process	Features
Through Stock Exchange	Online Terminal / Stock Broker	<ul style="list-style-type: none"> • Can trade as less as 1 Unit • Unit credit on T+1 • Transaction on Exchange traded price • No paperwork • Transaction on order matching and availability of quotes

About the Nifty Dividend Opportunities 50 Index

The Nifty Dividend Opportunities Index is designed to provide exposure to high yielding companies listed on NSE while meeting stability and tradability requirements. The methodology employs a yield driven selection criteria that aims to maximize yield while providing stability and tradability. Currently the index comprises of 50 companies from different sectors listed at the National Stock Exchange (NSE). The weights of the constituents is capped @ 10%

▶ Selection Criteria

The criteria for the Nifty Dividend Opportunities 50 Index include the following:

- i. Companies must rank within the top 300 companies by average freefloat market capitalisation and average daily turnover for the last six months.
- ii. The company's trading frequency should be at least 90% in the last six months.
- iii. Companies must have reported net profit as per latest annual audited results.
- iv. A dividend yield of each company is calculated using total dividend amount in the last 12 months (calculated based on ex-dividend date) prior to the rebalancing reference date using average market capitalization for one year period ending January.
- v. Top 25 companies ranked by annual dividend yield will be compulsorily included in the index and companies ranked below 75 by annual dividend yield will be compulsorily excluded from the index.
- vi. Final selection of 50 companies shall be done based on higher dividend yield.

Source: NSE Indices Ltd.

Note: The performance of the scheme shall be benchmarked to the Total Return (TRI) variant of the Index chosen as a benchmark

Why Invest in the Dividend Theme?

The advantage of investing in high dividend companies is that the investment offers the investor to capture both, the market movement as well as the dividends, thereby generating efficient returns in a risk adjusted manner through value stock investing.

Dividends are a great way with aim to build your long-term wealth. As witnessed in the developed countries, the dividend income forms a major part of the overall returns provided by the stock markets. India is still in its developing phase and this makes the Indian stock markets even more attractive as an investment avenue. Over the period, the investments made today may reap great returns.

Current Valuations

- **As on December 31st, 2024; P/E for Nifty Dividend Opportunities 50 Index is just 17.32** whereas that of Nifty 50 is 21.79
- There are certain high dividend paying companies on the NSE which are even more attractive in terms of valuations. They can offer income based value to one's portfolio along with stability and tradability
- During dividend season, the investors get the benefit to lock-in the returns on the portfolio
- The Nifty Dividend Opportunities 50 Index has a better Dividend Yield of 2.71 compared to the Nifty 50 Index Dividend Yield of 1.27 as on October 31st, 2024
- The P/E, P/B and Dividend Yield of Nifty Dividend Opportunities 50 Index are as follows:

Date	Index Level	Price Earning (P/E)	Price to Book (P/B)	Dividend Yield (%)

The historical index values are available on www.nseindia.com. Past performance may or may not be sustained in future. Investors are advised to consult their financial advisor before making any investment.

Source: NSE and MFI

- ▶ **Income based value to Portfolio:** Dividends can be a source of alternate income to the shareholders, hence companies that pay dividends can be wise investments, especially if you hold the stock over a long period. Even if the price per share of your stock doesn't go up much every year, you may still make money from the dividend payments, you don't have to sell your shares to get that money. Investing in dividend paying stocks can be a good investment strategy, if you want to earn through regular dividend income.
- ▶ **Capital Gains and Passive Income:** When you add the dividend into the price appreciation, you may have an option to enjoy not only current income, but growth too. The reason dividend-paying stocks are so powerful is because they combine the two most important aspects of wealth generation i.e. Capital Gains and Passive Income i.e. Dividend. One way to identify high dividend paying stocks is by using dividend yield as a guide. Dividend yield tells you what percentage the stock returns relative to its price.

Why is dividend important?

A successful company—one which earns real money every year has three options:

- ▶ It can reinvest those earnings into the company to make new products, find more customers, build new stores or factories, or make the business more efficient
- ▶ It can buy back its stock so that each remaining share owns more of the company
- ▶ It can return some of that money to shareholders in the form of **Dividends**

Dividends speak a lot about the company, a company paying high dividends regularly indicates a lot of things:

- ▶ **Company is doing well**
 - When a company is doing well, the net profit rises. Dividends are paid from the company's net profit. Also, dividends are the ultimate form of transparency - returning the cash to the people that own it i.e. the shareholders. Thus, dividends are one of the important signs of the health of a company
- ▶ **Company is confident of consistent growth**
 - Dividend payouts, especially increasing dividend payouts, reflect management's confidence in the sustainability of cash flow generation
- ▶ **Company believes in sharing profits with shareholders regularly**
 - Mature, well-established companies that faithfully provide earnings to shareholders have a reputation to keep up. When a company makes a commitment to provide profits to shareholders on an ongoing and consistent basis, it builds character and that commitment to being friendly to shareholders is one few companies like to break. Thus, dividends can be a steady source of alternate income to shareholders
- ▶ **Company likely to outperform the broader market**
 - Historically, dividend-paying stocks also perform better than the overall market during times in which stock prices are weak. Since stocks that pay dividends are generally more conservative and have stronger cash flows than those that do not, investors tend to gravitate toward dividend payers during times of trouble
