Nippon Life India Asset Management Limited (NAM India) is one of the largest asset managers with more than 28 years of experience in managing wealth of investors with a robust distribution network in India.

To cater to the increasing demand for passive management, we offer a variety of Exchange Traded Funds (ETFs) under "Nippon India ETFs". Currently, we offer eighteen equity ETFs – benchmarked against Nifty Bank TRI, Nifty 100 TRI, Nifty 50 TRI, Nifty Midcap 150 TRI, Nifty India Consumption TRI, Nifty Dividend Opportunities 50 TRI, Nifty 50 Value 20 TRI, Nifty Next 50 TRI, Nifty Infrastructure TRI, Nifty50 Shariah TRI, Nifty PSU bank TRI, Nifty CPSE TRI, Nifty IT TRI, Nifty Pharma TRI, Hang Seng TRI, BSE Sensex TRI, BSE Sensex Next 50 TRI & Nifty Auto TRI; four debt ETFs – benchmarked against Nifty 8-13 yr G- Sec Index, Nifty SDL Apr 2026 Top 20 Equal Weight Index, Nifty 5 Yr Benchmark G-Sec Index & Liquid ETF in money market space and two commodity ETFs – based on domestic prices of Gold and Silver.

Why Equity ETF?

- ▶ **Ease of transaction** - Can be easily bought / sold like any other stock on the exchange through terminals spread across the country
- ▶ **Ease of Liquidity** - Can be bought / sold anytime during market hours (subject to availability of buyer/seller) at prices prevailing in the market. Thus, investor transacts at real-time prices.
- ▶ **Low Cost** - Generally less expensive than investing in multiple individual securities.
- ▶ **Other Special Features**
 - Instant diversification through exposure to a large number of stocks by purchasing as low as 1 unit
 - Buying / selling at close to live price and not end-of-day, also ability to put limit orders
 - Authorised Participants/ Market Makers/ Large investors can buy directly from the AMC at Live Prices in creation unit sizes[^]

Strategies used through Index based Equity ETFs

- ▶ **Liquidity Management** - ETFs can be used for a given percentage of each asset class to provide a liquidity buffer across the asset allocation
- ▶ **Portfolio Completion** - ETFs allow investors to gain exposure to an asset class that is under-represented in the asset allocation
- ▶ **Cash Equitization** - ETFs assist in remaining fully invested into equity as per the allocation model, while maintaining liquidity, thus minimizing the cash drag effect on the portfolio
- ▶ **Portfolio Transitions** - Since ETFs are passive funds, they may help maintain market exposure while there are changes in sector/stock allocations in a portfolio, hence avoids the risk of missing any market movement

Transaction Options available for investors

Subscription	Process	Features
Through Stock Exchange	Online Terminal / Stock Broker	<ul style="list-style-type: none"> • Can trade as less as 1 Unit • Unit credit on T+1 • Transaction on Exchange traded price • No paperwork • Transaction on order matching and availability of quotes

Creation Unit size is the minimum denomination of unit that can be directly purchased/redeemed from AMC

Tradable Unit	Composition	Creation Unit Size [^]	NAV Value (Rs.)*	Approx. Basket Value (Rs.)*
1 Unit Nippon India ETF Nifty India Consumption	~ 1/100 of Nifty India Consumption Index	60,000 units of Nippon India ETF Nifty India Consumption	126.5572	75,93,432

*Data as of 31st October, 2024 taken as reference value

Importance of Creation Unit Size

- In case of non-availability of sizeable quote, Investors can transact with the AMC in creation unit lots[^]
- Investors can transact both in form of cash or stock basket comprising the index
- Units are created at live NAV price plus expenses

Nippon India ETF Nifty India Consumption

Investment Objective Nippon India ETF Nifty India Consumption

The investment objective of the scheme is to provide investment returns that, before expenses, closely correspond to the total returns of the securities as represented by the Nifty India Consumption Index, subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme will be achieved.

Positioning – Nippon India ETF Nifty India Consumption

- Nippon India ETF Nifty India Consumption is an Exchange Traded Fund (ETF) listed on NSE, and invests in Nifty India Consumption Index companies in the same proportion as the underlying Index
- Nippon India ETF Nifty India Consumption is less expensive than investing in individual securities of the Nifty India Consumption Index
- It provides an opportunity to Investors, who would like to participate in the domestic consumption growth story by passively investing in a well-diversified portfolio of well-known companies as approximately represented by Nifty India Consumption Index.

Benefits of Nippon India ETF Nifty India Consumption

- ▶ **Well Defined Portfolio:** Nippon India ETF Nifty India Consumption investment strategy & stock selection is clearly defined; it would replicate the Nifty India Consumption Index & invest only in companies forming the index in the same proportion as the underlying.
- ▶ **Diversification:** Currently, buying a single scheme unit will offer diversification benefit of 30 companies.
- ▶ **Transparency:** The Nifty India Consumption Index constituents are available in public domain on a daily basis.
- ▶ **Liquidity:** The ETF units will be traded on the exchanges & can be easily liquidated during the trading hours. Large Investors also have the option of coming to the AMC for procurement/sale of units in creation unit sizes^ (60,000 units with one unit equivalent to 1/100 of Nifty India Consumption Index).

Source: NSE & NSE Indices Ltd.

About the Index

The Nifty India Consumption Index is designed to reflect the behavior and performance of a diversified portfolio of companies representing the domestic consumption sector which includes sectors like Consumer Durables & Non-durables, Healthcare, Auto, Telecom Services, Pharmaceuticals, Hotels, Media & Entertainment, etc.

The Index comprises of 30 companies listed on the National Stock Exchange (NSE). Launched on July 2011 and base date of January 02, 2006 indexed to a base value of 1,000

- ▶ **Selection Criteria:** The criteria for the Nifty India Consumption Index include the following:
 - i. Companies should form part of NIFTY 500 at the time of review. In case, the number of eligible stocks representing within NIFTY 500 falls below 10, then deficit number of stocks shall be selected from the universe of stocks ranked within top 800. based on both average daily turnover and average daily full market capitalisation based on previous six months period data used for index rebalancing of Nifty 500.
In case, the number of eligible stocks in the universe is still less than 10, then the deficit number of stocks shall be selected from the universe of stocks ranked within top 1000, top 1100, top 1200 and so on, based on both average daily turnover and average daily full market capitalization based on previous six months period data, until at least 10 eligible stocks are obtained. If the number of eligible stocks is still less than 10, then the index may have less than 10 constituents.
 - ii. Companies should form a part of the consumption sector.
 - iii. More than 50% of the company's revenue must come from domestic markets (other than export income).
 - iv. The company's trading frequency should be at least 90% in the last six months.
 - v. The company should have a listing history of 6 months. A company which comes out with an IPO will be eligible for inclusion in the index, if it fulfills the normal eligibility criteria for the index for a 1 month period instead of a 6 month period.
 - vi. Final selection of 30 companies shall be done based on the free-float market.
 - vii. The review will be carried out on a semi-annual basis.
 - viii. At the time of rebalancing of shares/ change in index constituents/ change in investible weight factors (IWFs), the weightage of the index constituent (where applicable) is capped at 10%.

Note: The performance of the scheme shall be benchmarked to the Total Return (TRI) variant of the Index chosen as a benchmark

Why Invest in Consumption Theme?

Consumption forms the foundation of growing India. The consumption spend is expected to grow at a CAGR of ~14% in rupee terms over the next 10 years. This is almost twice the expected 7% GDP growth rate. There are various factors which support the Indian consumption growth story in the next few years:

- ▶ **Demographics:** India has a sizable young population, ideal for consumption spend. Nearly 500 mn people or close to 40% of the population is below 20 years and close to 800 mn or over two-thirds of the people are under 35 years.
- ▶ **The rural middle class:** The rural middle class offers a sizeable market for consumer companies as aspiration levels are rising in rural India.
- ▶ **Rising income and consequently affordability:** As income levels rise, affordability levels in India are rising. Spend on food has fallen to 20% of disposable income from 40% around 20 years ago.

- ▶ **Lower interest rates:** Falling interest rates may help spur consumption as a younger population is more willing to take loans and the spread of banking facilities makes it easier to avail credit.
- ▶ **Consumption is multiplying itself:** Over the past decade, private consumption more than tripled in nominal terms (from INR 13 trillion to INR 44 trillion at a CAGR of 12%) and almost doubled in real terms (CAGR of 6%). A six-fold rise in household consumption (over INR 270 trillion) is expected by 2025.
- ▶ **Strong demand side factors:** Household incomes will continue to increase and it is expected to be 3.7 times in households with >Rs500k annual income by 2025. At the same time, the number of individuals in the working age group of 20-35 years is likely to increase by 50mn by 2025. In addition, following factors will also fuel higher consumption:
 - easier access to financing
 - lesser aversion to risk
 - changing family structures (nuclearization & working women)
 - rising urbanization
- ▶ **Supply related issues easing:** Some of the India's supply related issues are being eased and others are being addressed:
 - Credit card boom and relaxed credit norms directed towards retail lending.
 - Increasing retail penetration, better media reach, and improved supply chain
 - Favorable tax regime – eg, GST, which will lower price to the consumer.
- ▶ **Consumption patterns will change as Indians prosper:** As Indians become richer, India's consumption pattern is likely to see a marked alteration:
 - Demand for premium products (luxury cars, cosmetics, dearer apartments etc.) will increase
 - Brand consciousness will drive demand for products from organized players
