Strategies used through Index based Equity ETFs

- ▶ **Liquidity Management** - ETFs can be used for a given percentage of each asset class to provide a liquidity buffer across the asset allocation
- ▶ **Portfolio Completion** - ETFs allow investors to gain exposure to an asset class that is under-represented in the asset allocation
- ▶ **Cash Equitization** - ETFs assist in remaining fully invested into equity as per the allocation model, while maintaining liquidity, thus minimizing the cash drag effect on the portfolio
- ▶ **Portfolio Transitions** - Since ETFs are passive funds, they may help maintain market exposure while there are changes in sector/stock allocations in a portfolio, hence avoids the risk of missing any market movement

Why Invest in Nifty PSU Bank?

Banking sector is backbone for any economy and is the key beneficiary as well as catalyst of economic recovery. We expect, the sector is set to benefit significantly from the domestic recovery over the medium to long term. The sector revival is usually characterized by the key phases of lowering of interest rates, asset quality improvement followed by higher credit off-take.
