A Flexi Cap fund can adapt to varied market scenarios by dynamically investing across market caps. Thus, it is a potential One Stop Solution to capture the opportunities across large, mid and small caps

Flexi Cap Strategy to make the most of Market Opportunities

**Presenting
Nippon India Flexi Cap Fund**

Investment Strategy

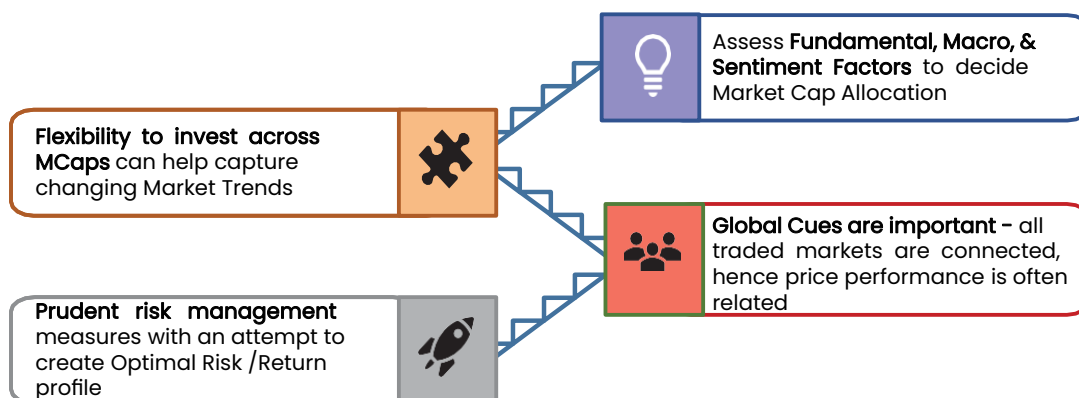

- **Market Cap allocation:** The fund would invest across large, mid and small caps based on market view and relative attractiveness.
- **Growth with Stability:** While the fund will attempt to create Alpha through bottom up stock selection and appropriate allocation to potentially high growth themes, it will maintain reasonable allocations to established leaders.
- Accordingly, for Large caps exposure the deviation will be capped at 50% from the benchmark weight.
- Well diversified portfolio across stock and sectors.
- **Investment approach:**

Lower deviation in Mega Caps

Active Divergence within rest of Large Cap basket

Mid and Small Caps: Focus on Core Growth + New Age Businesses

Our Strategy to navigate and benefit from Equity Shifts

Investment Framework

Parameter	Range
Market Cap	Large Cap deviation will be max 50% of Large Cap weight in the Benchmark (Nifty 500 TRI)
Active share	Active share is the percentage of fund holdings that is different from the benchmark holdings. A fund that has no holdings in common with the benchmark will have an Active Share of 100%, and a fund that has exactly the same holdings as the benchmark considered will have an Active Share of 0%. The fund would have an active share of 50 - 70%
Stock deviation	Top 5 stocks by weight in the Benchmark - for each stock max deviation of 40%
Stock Concentration	"Based on Internal assessment of Business Risk, stocks have been classified under four rating buckets: A,B,C,D with A being the best and D being the worst. While it may appear all the investments should be concentrated in the A or B bucket, the stocks may not be reasonably priced. At the same time, stocks rated C or D may offer opportunities at reasonable valuations. Cumulative exposure: Max 45% in C, Max 5% in D"
Sector deviation	Max deviation of financials - 8%

Current Focus Themes

Note: The sectors mentioned are not a recommendation to buy/sell in the said sectors. The scheme may or may not have future position in the said sectors.

NIMF Research capabilities

- One of the largest equity research team on the buy side in India - 27 members across fund management, fundamental research, economic research and quantitative analysis
- Experienced Fund Management Team – Research Team along with Fund Management Team has a cumulative experience of ~400 man years in Indian Equity Markets
- Strong coverage – Investment universe of ~550 stocks
- Dedicated team for small cap research

Why invest in Nippon India Flexi Cap Fund?

Thus, Nippon India Flexi Cap Fund aims to deliver better returns by investing in best opportunities across market caps. "The go anywhere" approach may help to generate alpha across market cycles.
