Gold – A foundation asset class for wealth creation

Gold a unique asset plays many roles within an investor's portfolio. Indian consumers consider gold jewellery as an investment and are well aware of gold's benefits as a store of value. Gold is also recognized as a tradable asset.

It is one of the foundation assets for Indian households and a means to accumulate wealth from a long term perspective. Gold investment has been in the culture of Indian tradition and has been on rise amongst the modern investors as well, due to the financial uncertainty and inflationary pressures.

Gold Demand Trends – Globally

Overview:

Gold demand firm; record prices prevail

OTC investment and central banks remained decisive

Gold demand excluding OTC in Q2 was down 6% y/y to 929t as a sharp decline in jewellery consumption outweighed mild gains in all other sectors. Adding in OTC investment to total gold demand yields a 4% y/y increase to 1,258t – the highest Q2 in our data series back to 2000.

The record gold price environment took its toll on Q2 jewellery consumption: volumes fell 19% y/y to a four-year low of 391t. Central bank net gold buying was 6% higher y/y at 183t, driven by the need for portfolio protection and diversification.

A minor 7t decline in global gold ETF holdings in Q2 compared positively with the 21t drop in Q2'23. Sizable early outflows were followed by nascent later inflows.

Retail bar and coin investment was 5% lower at 261t, primarily due to weak demand from Western markets.

Gold used in technology jumped 11% y/y, as the AI trend continued to drive demand in the sector.

The LBMA (PM) gold price averaged a record US\$2,338/oz in Q2 – 18% higher y/y and 13% higher q/q.

Gold reached a new record of US\$2,427/oz in May.

- **OTC investment of 329t was a significant component of Q2 total gold demand.** Together with continued central bank buying, it helped drive the price to a series of record highs during the quarter.
- **Total gold supply grew by 4% y/y to 1,258t.** Mine production of 929t was a record for a second quarter. Recycling supply was the highest for a second quarter since 2012, responding to the rising gold price.
- **Regional investment trends continued to diverge.** Demand for bars, coins and ETFs, was robust in the East, compared with a marked decline in the West. Western ETF investment flows have, however, started to return so far in Q3.
- **2024 full year outlook:** revived Western investment flows to balance out weaker consumer demand and potentially slower central bank buying vs 2023.

Key Highlights:

The LBMA (PM) gold price averaged a record US\$2,338/oz in Q2 – 18% higher y/y and 13% higher q/q.

Gold reached a new record of US\$2,427/oz in May.

- **OTC investment of 329t was a significant component of Q2 total gold demand.** Together with continued central bank buying, it helped drive the price to a series of record highs during the quarter.
- **Total gold supply grew by 4% y/y to 1,258t.** Mine production of 929t was a record for a second quarter. Recycling supply was the highest for a second quarter since 2012, responding to the rising gold price.
- **Regional investment trends continued to diverge.** Demand for bars, coins and ETFs, was robust in the East, compared with a marked decline in the West. Western ETF investment flows have, however, started to return so far in Q3.
- **2024 full year outlook:** revived Western investment flows to balance out weaker consumer demand and potentially slower central bank buying vs 2023.

Positioning of the Fund

Nippon India Gold Savings Fund, is the first domestic gold fund of fund in India which opens a new avenue for investing in gold as an asset class. The fund seeks to provide returns of gold through investments in Nippon India ETF Gold BeES, which in turn invest in physical gold. It enables you to reap the returns of gold in a paper form without the need of a demat account.

It is a passively managed fund which would enable an investor to save for gold in a convenient manner either through lump sum investment or through systematic investment – the mutual fund way from a long term perspective. It aims to give investors the opportunity to participate in the bullion market in a relatively cost effective and convenient way as you can directly purchase and sell the units at the AMC.

Investment Philosophy

A modern way of investing in "Gold" as an asset class the mutual fund way. An investment opportunity which enables an investor to allocate gold a foundation asset to his portfolio in a systematic way. This fund would enable you to add the yellow metal which is usually considered to diversify your portfolio in a convenient way.

- ▶ Passively managed Fund of Fund investing in Open-ended Nippon India ETF Gold BeES
- ▶ Invests exclusively in Nippon India ETF Gold BeES which in turn invests in physical gold which shall be of fineness (or purity) of 995 parts per 1000 (99.5 %)
- ▶ Portfolio focused on providing returns that closely correspond to the returns provided by Nippon India ETF Gold BeES

Benefits of Investing in Nippon India Gold Savings Fund

- ▶ **Open door for non - demat a/c holders:** Investors can invest in this fund through the physical mode across the country thereby making it easily available and convenient for non demat a/c holders.
- ▶ **Systematic Investment Plan (SIP):** a long term disciplined investment technique under which you invest a fixed sum of money on a monthly or quarterly basis in a scheme at the prevailing NAV. This allows you to save and invest regularly while you are earning.

This investment technique enables you the following benefits:

- ▶ **Small, regular investments:** A simple way to enter the market by investing small amounts. Small but regular investments go a long way in creating wealth over time
- ▶ **Rupee cost averaging:** Fewer units during rising markets and more units during falling markets, thereby reduces the average cost per unit
- ▶ **No need for 'timing the markets':** No need to select the right time and quantity to buy and sell as timing the market is time consuming and risky. It eliminates the need to actively track the markets.
- ▶ **Availability of add-on facilities:** Ease of availing add on facilities like Systematic Transfer Plan/ Systematic Withdrawal Plan / Systematic Investment Plan/ auto switch /trigger facility etc.
- ▶ **Liquidity:** An investor of Nippon India Gold Savings Fund can subscribe and redeem units on all business days directly from the AMC, while purchase and sale of gold ETF units is a factor of liquidity on the exchange.
- ▶ **Ease of investing:** Investing in gold through Nippon India Gold Savings Fund, the investor can directly subscribe/ redeem units through the physical mode at the various designated investor service centre across the country thereby making it easily accessible and convenient.
- ▶ **Cost Effective:** Investing in gold through the Nippon India Gold Savings Fund in physical application mode enables you invest in a low cost manner as the investor does not have to incur charges like storage cost of physical gold, annual maintenance charges for demat account, delivery brokerages charges, transaction charges incurred for investing through the dematerialized mode.

The investors will be bearing the recurring expenses of the scheme, in addition to the expenses of underlying Scheme.

Portfolio & Scheme Features as on 31st December, 2024

Portfolio as on 31st December, 2024	
Nippon India ETF Gold Bees	99.99%
Cash and Other Receivables	0.01%
Grand Total	100.00%

Asset Allocation

Under normal circumstances, the anticipated asset allocation would be:

Instruments	Indicative asset allocation (% of total assets)		Risk Profile
	Minimum	Maximum	
Units of Nippon India ETF Gold BeES	95	100	Medium to High
Reverse repo and /or Tri - Party Repo on G-Secs or T-Bills and/ or short-term fixed deposits and/or Schemes which invest predominantly in the money market securities or Liquid Schemes*	0	5	Low to Medium

*The Fund Manager may invest in Liquid Schemes of Nippon India Mutual Fund. However, the Fund Manager may invest in any other scheme of a mutual fund registered with SEBI, which invest predominantly in the money market securities.

The deviation from the underlying ETF may occur mainly on account of the receipt of cash flows which on an average takes 5 days given the existing operational procedure.
