## Gold – A foundation asset class for wealth creation

Gold a unique asset plays many roles within an investor's portfolio. Indian consumers consider gold jewellery as an investment and are well aware of gold's benefits as a store of value. Gold is also recognized as a tradable asset.

It is one of the foundation assets for Indian households and a means to accumulate wealth from a long term perspective. Gold investment has been in the culture of Indian tradition and has been on rise amongst the modern investors as well, due to the financial uncertainty and inflationary pressures.

## Gold Demand Trends – Globally

### Overview:

**Another year of blistering central bank buying, together with resilient jewellery consumption, offset sizable ETF outflows.** Annual gold demand (excluding OTC) of 4,448t was 5% below a very strong 2022. Inclusive of significant OTC and stock flows (398t), total gold demand in 2023 was the highest on record at 4,899t.

Central bank buying maintained a breakneck pace. Annual net purchases of 1,037t almost matched the 2022 record, falling just 45t short.

Global gold ETFs saw a third consecutive annual outflow, losing 244t. The pace of outflows slowed markedly into year-end, but October's hefty outflows dominated the Q4 picture.

Annual bar and coin investment saw a mild contraction (-3% y/y) as divergent trends in key Western and Eastern markets offset one another.

Annual jewellery consumption held steady at 2,093t, even in the very high gold price environment. China's recovery supported the robust global total.

Despite a Q4 recovery in electronics, the annual volume of gold used in technology fell below 300t for the first time in our data series.

### Key Highlights:

**The LBMA (PM) gold price ended 2023 at US\$2,078.4/oz – a record high year-end close – generating an annual return of 15%.** The average 2023 gold price of US\$1,940.54 /oz – also a record – was 8% higher than 2022.

**Q4 gold demand of 1,150t (excluding OTC and stock flows) was 8% above the five-year average.** But this is 12% weaker y/y when compared with the record quarter of 1,303t in Q4'22. Positive y/y comparisons in Technology and ETFs were outweighed by the y/y decline in central bank buying.

**OTC investment was reflected in gold price strength during 2023.** This source of gold demand, while opaque, was clearly evident again in Q4 as the gold price rallied despite continued ETF outflows.

**Annual mine production increased 1% y/y to 3,644t, but fell short of the 2018 record.** Full year recycling responded to high gold prices, rising to 1,237t (+9% y/y). Total gold supply was 3% higher y/y as a result.

**Source :** World Gold Council

## Positioning of the Fund

**Nippon India Gold Savings Fund, is the first domestic gold fund of fund in India which opens a new avenue for investing in gold as an asset class. The fund seeks to provide returns of gold through investments in Nippon India ETF Gold BeES, which in turn invest in physical gold. It enables you to reap the returns of gold in a paper form without the need of a demat account.**

It is a passively managed fund which would enable an investor to save for gold in a convenient manner either through lump sum investment or through systematic investment – the mutual fund way from a long term perspective. It aims to give investors the opportunity to participate in the bullion market in a relatively cost effective and convenient way as you can directly purchase and sell the units at the AMC.

## Investment Philosophy

A modern way of investing in "Gold" as an asset class the mutual fund way. An investment opportunity which enables an investor to allocate gold a foundation asset to his portfolio in a systematic way. This fund would enable you to add the yellow metal which is usually considered to diversify your portfolio in a convenient way.

- ▶ Passively managed Fund of Fund investing in Open-ended Nippon India ETF Gold BeES
- ▶ Invests exclusively in Nippon India ETF Gold BeES which in turn invests in physical gold which shall be of fineness (or purity) of 995 parts per 1000 ( 99.5 % )
- ▶ Portfolio focused on providing returns that closely correspond to the returns provided by Nippon India ETF Gold BeES

## Benefits of Investing in Nippon India Gold Savings Fund

- ▶ **Open door for non – demat a/c holders:** Investors can invest in this fund through the physical mode across the country thereby making it easily available and convenient for non demat a/c holders.
- ▶ **Systematic Investment Plan (SIP):** a long term disciplined investment technique under which you invest a fixed sum of money on a monthly or quarterly basis in a scheme at the prevailing NAV. This allows you to save and invest regularly while you are earning.

This investment technique enables you the following benefits:

- ▶ **Small, regular investments:** A simple way to enter the market by investing small amounts. Small but regular investments go a long way in creating wealth over time

- ▶ **Rupee cost averaging:** Fewer units during rising markets and more units during falling markets, thereby reduces the average cost per unit
- ▶ **No need for 'timing the markets':** No need to select the right time and quantity to buy and sell as timing the market is time consuming and risky. It eliminates the need to actively track the markets.
- ▶ **Availability of add-on facilities:** Ease of availing add on facilities like Systematic Transfer Plan/ Systematic Withdrawal Plan / Systematic Investment Plan/ auto switch /trigger facility etc.
- ▶ **Liquidity:** An investor of Nippon India Gold Savings Fund can subscribe and redeem units on all business days directly from the AMC, while purchase and sale of gold ETF units is a factor of liquidity on the exchange.
- ▶ **Ease of investing:** Investing in gold through Nippon India Gold Savings Fund, the investor can directly subscribe/ redeem units through the physical mode at the various designated investor service centre across the country thereby making it easily accessible and convenient.
- ▶ **Cost Effective:** Investing in gold through the Nippon India Gold Savings Fund in physical application mode enables you invest in a low cost manner as the investor does not have to incur charges like storage cost of physical gold, annual maintenance charges for demat account, delivery brokerages charges, transaction charges incurred for investing through the dematerialized mode.

The investors will be bearing the recurring expenses of the scheme, in addition to the expenses of underlying Scheme.
