Nippon Life India Asset Management Limited (NAM India) is one of the largest asset managers with more than 30 years of experience in managing wealth of investors with a robust distribution network in India and a global reach through its various subsidiaries.

Nippon India Mutual Fund
MF/022/95/1

Why Index Fund?

- ▶ **Less of Ambiguity:** The Index funds investment strategy & stock selection is clearly defined, holding stocks as per the underlying Index in the same weightages (subject to expense ratio & tracking error).
- ▶ **Diversification** - Buying a single unit offers diversification benefit in the entire index companies.
- ▶ **Low Cost** - Generally less expensive than investing in multiple individual securities/active equity fund. (Low cost with respect to Total Expense Ratio)

Strategies used through Index based Equity Index Funds

- ▶ **Liquidity Management** - Index funds can be used for a given percentage of each asset class to provide a liquidity buffer across the asset allocation.
- ▶ **Portfolio Completion** - Index funds allow investors to gain exposure to an asset class that is under-represented in the asset allocation.
- ▶ **Cash Equitization** – Index funds assist in remaining fully invested into equity as per the allocation model, while maintaining liquidity, thus minimizing the cash drag effect on the portfolio.
- ▶ **Portfolio Transitions** – Since index funds are passive funds, they may help maintain market exposure while there are changes in sector/stock allocations in a portfolio, hence avoids the risk of missing any market movement.

Nippon India Nifty 500 Low Volatility 50 Index Fund

Investment Objective : Nippon India Nifty 500 Low Volatility 50 Index Fund

The investment objective of the scheme is to provide investment returns that commensurate to the total returns of the securities as represented by the Nifty 500 Low Volatility 50 Index before expenses, subject to tracking errors. However, there is no assurance that the investment objective of the Scheme will be achieved.

Why Invest in Nippon India Nifty 500 Low Volatility 50 Index Fund

- **Capture Low Volatility:** Aims to identify companies with relatively **low volatility**
- **Diversification:** Provides diversification **across market caps** (Large, Mid and Small) & **Sectors**
- **Rules Based:** The entry and exit of stocks are **determined on specific rules** as per the index methodology
- **Reduced Risk: Elimination of non-systematic risks** like stock picking and portfolio manager selection, via investing in the Nippon India Nifty 500 Low Volatility 50 Index Fund
- **Opportunity:** Will also **allow non demat account holders to seek exposure to less volatile stocks** across Nifty 500 via investing in Nippon India Nifty 500 Low Volatility 50 Index Fund
- **SIP Investments:** Investors can avail the benefit of Systematic Investment Plan (SIP)[®]
- **Low Cost:** Exposure to the basket of 50 companies via low cost[^] index fund

[^]Low cost in terms of total expense ratio.

@SIP disclaimer - SIP stands for Systematic Investment Plan, wherein you can regularly invest a fixed amount at periodical intervals and aim for benefits over a period of time through the power of compounding

About Nifty 500 Low Volatility 50 Index

Overview

Nifty 500 Low Volatility 50 Index which aims to track the performance of the top 50 companies within the Nifty 500 selected based on their volatility. The index has a base date of April 01, 2005, with a base value of 1000.

Index Methodology:

Universe:

Stocks forming part / going to be a part of the Nifty 500 index at the time of review

Eligible Universe:

Each stock within the universe is eligible to be the part of the index subject to following:

- Listing history of 1 year as on the cut-off date
- Non F&O stocks hitting the circuit filter more than 20% of the trading days in past 6 months as on cut-off date are excluded
- Companies having percentage pledged promoter's shares greater than 20% are excluded
- Bottom 10 percentile stocks based on 6 month average daily turnover are excluded
- Bottom 10 percentile stocks based on Turnover ratio are excluded

Stock selection criteria:

- Stocks are assessed on the basis of volatility for index inclusion
- Low Volatility is calculated as the inverse of standard deviation of daily price returns (log normal) for last one year
- Top 50 ranked stocks with least volatility form part of the index

Weights and Capping:

- Weight of the stock in the index is derived by multiplying the free float market cap with low volatility score of that stock
- Each stock in the index is capped at the lower of 5% or 5 times the weight of the stock in the index based only on free float market capitalization
- Capping will be done semi-annually at the time of rebalancing
- The weight of stocks may drift between two rebalancing periods due to movement in the stock prices

Index Constituents:

- Index rebalancing and reconstitution will be done on a semi-annual basis in June and December using data ending last trading day of May and November respectively
- Stocks that moved out of the Nifty 500 index shall also move out of the index at the time of the subsequent review of the Nifty 500 Low Volatility 50 Index
- If the rank of stocks within the index falls beyond 75, the stock is compulsorily excluded while if the rank of stocks in eligible universe is within Top 25, it is compulsorily included, replacing existing stocks with lowest volatility score
- Apart from the scheduled semi-annual review, additional ad-hoc reconstitution and rebalancing of the index shall be initiated in case any of the index constituents is removed from Nifty 500 index due to any corporate action (scheme of arrangement, delisting etc.) or suspension by the exchange etc.
- Further, on a quarterly basis, indices will be screened for compliance with the portfolio concentration norms for ETFs/ Index Funds announced by SEBI on January 10, 2019. In case of non-compliance of any of the stated norms, suitable corrective measures such as replacement of ineligible stock, re-alignment of constituent weights will be undertaken depending upon the nature of non-compliance to ensure the compliance with the norms
