Nippon Life India Asset Management Limited (NAM India) is one of the largest asset managers with more than 28 years of experience in managing wealth of investors with a robust distribution network in India.

Why Index Fund?

- ▶ **Less of Ambiguity:** The Index funds investment strategy & security selection is clearly defined, holding securities as per the underlying Index in the same weightages (subject to expense ratio & tracking error).
- ▶ **Diversification** – Buying a single unit offers diversification benefit in the entire index companies / issuers.
- ▶ **Low Cost** – Generally less expensive than investing in multiple individual securities. (Low cost with respect to Total Expense Ratio)

Strategies used through Index Funds

- ▶ **Liquidity Management** – Index funds can be used for a given percentage of each asset class to provide a liquidity buffer across the asset allocation.
- ▶ **Portfolio Completion** – Index funds allow investors to gain exposure to an asset class that is under-represented in the asset allocation.
- ▶ **Portfolio Transitions** – Since index funds are passive funds, they may help maintain market exposure while there are changes in securities holdings in a portfolio, hence avoids the risk of missing any market movement.

Nippon India Nifty AAA CPSE Bond Plus SDL – Apr 2027 Maturity 60:40 Index Fund

Investment Objective :

The investment objective of the scheme is to provide investment returns closely corresponding to the total returns of the securities as represented by the Nifty AAA CPSE Bond Plus SDL Apr 2027 60:40 Index before expenses, subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme will be achieved.

Investment Strategy :

Scheme would predominantly invest into AAA CPSE Bonds and State Development Loans (SDLs) representing Nifty AAA CPSE Bond Plus SDL Apr 2027 60:40 Index.

- Securities which will form part of the scheme portfolio are expected to have in the aggregate, key characteristics of the underlying index in terms of maturity profile and type of securities.
- Scheme will follow Buy and Hold investment strategy in which existing AAA CPSE Bonds and SDLs will be held till maturity, subject to quarterly index rebalancing.
- Portfolio will be rolled down in line with the index, hence incremental investment will be in AAA CPSE Bonds and SDLs representing the index.
- In case of maturity of any or all AAA CPSE Bonds and SDLs which are part of the Scheme portfolio, the maturity proceeds will be deployed in the outstanding security of the same issuer having longest maturity or Treasury bills or Tri-Party Repos on Government securities or Treasury bills, till the scheme "Maturity Date".
- Scheme will mature in line with the maturity of the index

Why Invest in Nippon India Nifty AAA CPSE Bond Plus SDL – Apr 2027 Maturity 60:40 Index Fund?

- **Relatively Safe** : The Fund would predominantly invest into AAA CPSE Bonds and State Development Loans (SDLs) which are government securities. Hence, it is relatively safe as compared to Equity and other Debt funds.
- **Opportunity** : Will allow non demat account holders to seek exposure in passive debt fund via investing in Nippon India Nifty AAA CPSE Bond Plus SDL – Apr 2027 60:40 Index Fund
- **No lock-in** : Subscribing and redeeming units with mutual fund anytime during the life of the fund.
- **Reduce Risk** : Reduction in non-systematic risk like security selection and portfolio manager selection, as the fund will apply buy & hold strategy and follow the index.
- **Low Cost** : Fund will be managed at low cost.

About Nifty AAA CPSE Bond Plus SDL Apr 2027 60:40 Index

Overview

Nifty AAA CPSE Bond Plus SDL Apr 2027 60:40 Index seeks to measure the performance of portfolio of AAA rated bonds issued by PSUs and State Development Loans (SDLs) maturing during the twelve month period ending April 30, 2027. The index is computed using the total return methodology including price return and coupon return. The index has a base date of March 16, 2022 and a base value of 1000.

The methodology is in compliance with the Norms for Debt Exchange Traded Funds (ETFs)/Index Funds announced by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 on May 23, 2022

Index Structure

The index contains 2 components as on the base date of index

1. AAA CPSE Bond component: Most liquid bond issued by 9 AAA rated PSUs selected based on the highest composite liquidity score maturing during the twelve month period ending April 30, 2027.
 2. SDL component: Most recently issued SDL by 13 states/UTs selected based on the highest outstanding amount maturing during the twelve month period ending April 30, 2027.
1. **Methodology for AAA CPSE Bond component – Constituting 60% of the index**

Eligibility Norms

• Issuer eligibility

Issuing entity should be domiciled in India and should satisfy any one of the following:

1. Central Public Sector Enterprises (CPSEs) as listed on DPE & DIPAM website.
2. Maharatna, Navratna and Miniratna as listed on DPE website, if not included in CPSEs list as mentioned in point 1.
3. Public Financial Institutions (PFIs) owned and managed by GOI and not included in points 1 and 2 above.
4. Statutory body set-up by Act of Parliament and included in the list of public enterprises sourced from <https://www.indiabudget.gov.in/> having outstanding bonds of more than Rs. 100 crores in the eligible maturity bucket.

• Bond eligibility

Bond should be

1. Plain vanilla with fixed coupon and fixed maturity
2. Denominated in INR
3. Be listed and traded on NSE and/or BSE and should be rated

Bond should not be

1. Tax Free
2. Floating Rate Bond
3. Partially Paid up
4. Perpetual
5. Having Single Option (Call/Put)
6. Having step up/step down coupon which is linked to any contingent event
7. Convertible bonds
8. Having staggered redemption

Selection Criteria

• Issuer Selection

- Eligible issuers having credit rating of "AAA" (Triple A) and having eligible bonds maturing during the twelve month period ending April 30, 2027 at the time of index creation/review are shortlisted. In case an entity is rated by multiple rating agencies, the lowest rating assigned to the Non-Convertible Debenture/Long Term Debt of the entity is considered for the index selection purpose.
- Further, 9 issuers based on the highest composite liquidity score are selected to be part of the index.
- The composite liquidity score is calculated by allocating 80% weight to aggregate trading value, 10% weight to number of days traded and 10% weight to number of trades of all the eligible bonds of issuers during the twelve month period prior to January 31, 2022.

• Bond Selection

- As on January 31, 2022, for every selected issuer, most liquid bond based on composite liquidity score calculated based on the trades available during the latest month is selected to be part of the index. In case a shortlisted issuer has no bond traded in the latest month, the period of analysis is relaxed to last 2 months and then to last 3 months and so on till 12 months.
- The composite liquidity score is calculated by allocating 80% weight to aggregate trading value, 10% weight to number of days traded and 10% weight to number of trades of the bond.
- If no bonds of an issuer are traded in the last 12 months, the bond with the longest maturity is selected to be part of the index.
- Only one bond per issuer to be part of the index.

Weight Assignment

- Each issuer that is part of the AAA CPSE Bond component (constituting 60% of the index) is given equal weight as on the base date of the index.
- Subsequently, the security level weights may drift due to price movement and accordingly, the total 60% weight of the AAA CPSE Bond component may also drift.
- Any coupon amount received is assumed to be reinvested in the portfolio on the same date, in the proportion of the existing weights.

2) Methodology for SDL component – Constituting 40% of the Index

Eligibility norms

SDL should not be a special security

Issuer Selection

13 states/UTs are selected based on the highest outstanding amount as on January 31, 2022 maturing during the twelve month period ending April 30, 2027.

Security Selection

- As on January 31, 2022, most recently issued SDL of each of the selected 13 states/UTs from the above universe maturing during the twelve month period ending April 30, 2027, is selected to be part of the index. These selected 13 securities will continue to remain in the index till they mature.
- Only one SDL per state/UT to be part of the index.

Weight Assignment

- Each state that is part of the SDL component (constituting 40% of the index) is given equal weight as on the base date of the index.
- Subsequently, the security level weights may drift due to price movement and accordingly, the total 40% weight of the SDL component may also drift.
- Any coupon amount received is assumed to be reinvested in the portfolio on the same date, in the proportion of the existing weights.

Index Rebalancing/Reconstitution

- On a quarterly basis, index will be screened for compliance with the Norms for Debt Exchange Traded Funds (ETFs)/Index Funds announced by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 on May 23, 2022. In case of non-compliance, suitable corrective measures will be taken to ensure compliance with the norms.
- During the quarterly review, the total weights to the AAA CPSE Bond and SDL components will be reset to the original 60:40 and the underlying security level weights within each component will be also reset to equal weight.
- Based on the governments 'in principle approval' to disinvest its stake in some of the PSUs, such entities are not included to be part of the index at launch/inception of the index. On account of disinvestment in an existing constituent, such issuer shall be excluded from the index effective next rebalancing/reconstitution only if the disinvestment process has been completed.
- In case a new eligible issuer gets downgraded before the portfolio disclosure date (T-3), such issuer shall not be included in the index.
- Apart from scheduled review, in case an existing issuer gets downgraded below AAA, bonds of such issuer to be excluded from the index within 5 working days from such downgrade, in compliance with the Norms for Debt Exchange Traded Funds (ETFs)/Index Funds announced by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 on May 23, 2022.
- Due to the above stated reasons, if the index is rebalanced and issuer/s move out of the index,
 - If the total number of AAA CPSE issuers in the index is 5 and above, then the total weight of the AAA CPSE securities being excluded will be redistributed among the remaining AAA CPSE securities proportionally. This will be subject to issuer limit in compliance with the Norms for Debt Exchange Traded Funds (ETFs)/Index Funds announced by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 on May 23, 2022.
 - If the total number of AAA CPSE issuers in the index fall below 5, then new AAA CPSE issuers will be included in the index based on the issuer selection and bond selection criteria mentioned in the AAA CPSE Bond component index methodology section above, to take the AAA CPSE issuer count to 5 and the total existing weightage of AAA CPSE Bond component will be divided equally amongst all the AAA CPSE issuers in the index.
- Except for above stated reasons, there will be no inclusion and exclusion in the index during the quarterly review.
- As the index includes securities that shall mature during the twelve month period ending on the final maturity date of the index, any proceeds from the security redemption prior to the final maturity date of the index shall be re-invested using the following waterfall approach:
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (SDL in case of state/UT and Bond/money market instrument in case of corporate bond) and maturing on or just before the index maturity date with the same weightage. This will be subject to single issuer limit in compliance with the Norms for Debt Exchange Traded Funds (ETFs)/Index Funds announced by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 on May 23, 2022.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights. This will be subject to single issuer limit in compliance with the Norms for Debt Exchange Traded Funds (ETFs)/Index Funds announced by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 on May 23, 2022.
 - In case due to any reason, it is not possible to meet any norms as prescribed by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated May 23, 2022, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.

Index Termination

The index shall mature on April 30, 2027

B: Benchmark, AB: Additional Benchmark, TRI: Total Return Index

TRI – Total Returns Index reflects the returns on the index arising from (a) constituent stock price movements and (b) dividend receipts from constituent index stocks, thereby showing a true picture of returns.

Period for which scheme’s performance has been provided is computed basis last day of the month–end preceding the date of advertisement.

Past performance may or may not be sustained in future and the same may not necessarily provide the basis for comparison with other investment. Performance of the schemes (wherever provided) are calculated basis CAGR for the past 1 year, 3 years, 5 years and Since Inception. IDCWs (if any) are assumed to be reinvested at the prevailing NAV. Performance of the scheme would be Net of Dividend distribution tax, if any. Face value of scheme is Rs.10/- per unit. In case, the start/end date of the concerned period is non-business day (NBD), the NAV of the previous date is considered for computation of returns.

Finance Act 2020 has abolished dividend distribution tax on IDCW declared and paid by Mutual Fund scheme. W.e.f. 01.04.2020 IDCW received from Mutual fund scheme is taxable in the hands of investor and mutual fund scheme is required to withhold tax on IDCW as per applicable rate.

Performance of other open ended schemes managed by the same fund managers as on 31st December, 2024

*Investors should consult their financial advisors if in doubt about whether the product is suitable for them.

Risk Factors: Mutual Funds and securities investments are subject to market risks such as trading volumes, settlement risk, liquidity risk and default risk including the possible loss of principal and there is no assurance or guarantee that the objectives of the Scheme will be achieved. As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down. Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme. The present scheme is not a guaranteed or assured return scheme. For more details, refer Scheme Information Document (SID).
