Nippon Life India Asset Management Limited (NAM India) is one of the largest asset managers with more than 28 years of experience in managing wealth of investors with a robust distribution network in India and a global reach through its various subsidiaries.

Why Index Fund?

- ▶ **Less of Ambiguity:** The Index funds investment strategy & stock selection is clearly defined, holding stocks as per the underlying Index in the same weightages (subject to expense ratio & tracking error).
- ▶ **Diversification** – Buying a single unit offers diversification benefit in the entire index companies.
- ▶ **Low Cost** – Generally less expensive than investing in multiple individual securities/active equity fund. (Low cost with respect to Total Expense Ratio)

Strategies used through Index based Equity Index Funds

- ▶ **Liquidity Management** – Index funds can be used for a given percentage of each asset class to provide a liquidity buffer across the asset allocation.
- ▶ **Portfolio Completion** – Index funds allow investors to gain exposure to an asset class that is under-represented in the asset allocation.
- ▶ **Cash Equitization** – Index funds assist in remaining fully invested into equity as per the allocation model, while maintaining liquidity, thus minimizing the cash drag effect on the portfolio.
- ▶ **Portfolio Transitions** – Since index funds are passive funds, they may help maintain market exposure while there are changes in sector/stock allocations in a portfolio, hence avoids the risk of missing any market movement.

Nippon India Nifty Alpha Low Volatility 30 Index Fund

Investment Objective: Nippon India Nifty Alpha Low Volatility 30 Index Fund

The investment objective of the scheme is to provide investment returns closely corresponding to the total returns of the securities as represented by the Nifty Alpha Low Volatility 30 Index before expenses, subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme will be achieved.

Why Invest in Nippon India Nifty Alpha Low Volatility 30 Index Fund

- **Multi Factor Strategy:** Provides exposure to two factors through single index product thus benefitting from combination of both Alpha and Low Volatility factors i.e. potential for growth and stability.
- **Reduce Risk:** Elimination of non-systematic risks like stock picking and portfolio manager selection, via rule based investing in the 30 stocks.
- **Convenience:** Will also allow non-demat account holders to seek exposure to large and midcap stocks via investing through Nippon India Nifty Alpha Low Volatility 30 Index Fund.
- **SIP Investments:** Investors can avail the benefit of Systematic Investment Plan (SIP).

About Nifty Alpha Low Volatility 30 Index

Overview

Nifty Alpha Low-Volatility 30 Index is designed to reflect the performance of a portfolio of stocks selected based on combination of Alpha and Low Volatility. The Index consists of 30 stocks selected from Nifty 100 and Nifty Midcap 50.

Index Methodology:

1. All constituents forming part of NIFTY 100 and NIFTY Midcap 50 at the time of review are eligible for inclusion in the index.
2. Stocks should be available for trading in derivative segment (F&O). Constituents should have a minimum listing history of 1 year.
3. Index consist of well diversified portfolio of 30 stocks selected based on combination of 2 factors – Alpha and Low-Volatility (explained in next page).
4. Stock selection and weights are derived from factor scores resulting in portfolio capturing the essence of underlying factor dynamics.
5. Stock weights are capped at the lower of 5% or 5 times the weight of the stock in the index based only on free float market capitalization.

Index Rebalancing

The index is rebalanced semi-annually in June and December.

Selection criteria of stocks based on below factors

Selection

Alpha (50%)

Low Volatility (50%)

Parameters Used

High Jensen's Alpha \wedge

Low Standard Deviation
of price returns

Period Considered

Previous one year prices

Previous one year prices

\wedge Alpha calculation: $as = rs - [rf + \beta s (rm - rf)]$

as: Alpha of the stock

rs: Average of daily return of security during previous 12 months

rf : Average of daily 3 Month MIBOR rate during previous 12 months

rm : Average of daily return of index i.e. Nifty 50

βs : Beta of the security calculated based on previous 12 month period

Source: NSE Indices Ltd. For more details, please refer the methodology document.

Note: The performance of the scheme shall be benchmarked to the Total Return (TRI) variant of the Index chosen as a benchmark.
