Nippon Life India Asset Management Limited (NAM India) is one of the largest asset managers with more than 28 years of experience in managing wealth of investors with a robust distribution network in India and a global reach through its various subsidiaries.

Why Index Fund?

- ▶ **Less of Ambiguity:** The Index funds investment strategy & stock selection is clearly defined, holding stocks as per the underlying Index in the same weightages (subject to expense ratio & tracking error).
- ▶ **Diversification** - Buying a single unit offers diversification benefit in the entire index companies.
- ▶ **Low Cost** - Generally less expensive than investing in multiple individual securities/active equity fund. (Low cost with respect to Total Expense Ratio)

Strategies used through Index based Equity Index Funds

- ▶ **Liquidity Management** - Index funds can be used for a given percentage of each asset class to provide a liquidity buffer across the asset allocation.
- ▶ **Portfolio Completion** - Index funds allow investors to gain exposure to an asset class that is under-represented in the asset allocation.
- ▶ **Cash Equitization** - Index funds assist in remaining fully invested into equity as per the allocation model, while maintaining liquidity, thus minimizing the cash drag effect on the portfolio.
- ▶ **Portfolio Transitions** - Since index funds are passive funds, they may help maintain market exposure while there are changes in sector/stock allocations in a portfolio, hence avoids the risk of missing any market movement.

Nippon India Nifty IT Index Fund

Investment Objective: Nippon India Nifty IT Index Fund

The investment objective of the scheme is to provide investment returns that commensurate to the total returns of the securities as represented by the Nifty IT Index before expenses, subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme will be achieved.

Why Invest in Nippon India Nifty IT Index Fund

- **SIP Investments:** Investors can avail the benefit of Systematic Investment Plan (SIP).

Note: * as per Nifty IT Index Methodology

About Nifty IT Index

Overview

The Nifty IT index is designed to reflect the behaviour of companies engaged into activities such as software development, hardware, IT infrastructure etc. The base date of the index is January 1, 1996.

Index Methodology:

1. Companies should form part of NIFTY 500 at the time of review. In case, the number of eligible stocks representing within NIFTY 500 falls below 10, then deficit number of stocks shall be selected from the universe of stocks ranked within top 800 based on both average daily turnover and average daily full market capitalisation. In case, the number of eligible stocks in the universe is still less than 10, then the deficit number of stocks shall be selected from the universe of stocks ranked within top 1000, top 1100, top 1200 and so on, based on both average daily turnover and average daily full market capitalization based on previous six months period data, until at least 10 eligible stocks are obtained. If the number of eligible stocks is still less than 10, then the index may have less than 10 constituents.
2. Companies should form a part of the IT sector.
3. The company's trading frequency should be at least 90% in the last six months.
4. The company should have a minimum listing history of 1 month as on the cutoff date.
5. Final selection of 10 companies shall be done based on the free-float market capitalization. A preference shall be given to companies that are available for trading in NSE's Futures & Options segment at the time of final selection.
6. Companies will be included if free-float market capitalisation is at least 1.5 times the free-float market capitalization of the smallest index constituent in respective index.
7. Weightage of each stock in the index is calculated based on its free-float market capitalization such that no single stock shall be more than 33% and weightage of top 3 stocks cumulatively shall not be more than 62% at the time of rebalancing.

Index Rebalancing

The index is rebalanced semi-annually in March and September.
