Nippon Life India Asset Management Limited (NAM India) is one of the largest asset managers with more than 28 years of experience in managing wealth of investors with a robust distribution network in India.

Why Index Fund?

- ▶ **Less of Ambiguity:** The Index funds investment strategy & security selection is clearly defined, holding securities as per the underlying Index in the same weightages (subject to expense ratio & tracking error).
- ▶ **Diversification** – Buying a single unit offers diversification benefit in the entire index companies / issuers.
- ▶ **Low Cost** – Generally less expensive than investing in multiple individual securities. (Low cost with respect to Total Expense Ratio)

Strategies used through Index Funds

- ▶ **Liquidity Management** – Index funds can be used for a given percentage of each asset class to provide a liquidity buffer across the asset allocation.
- ▶ **Portfolio Completion** – Index funds allow investors to gain exposure to an asset class that is under-represented in the asset allocation.
- ▶ **Portfolio Transitions** – Since index funds are passive funds, they may help maintain market exposure while there are changes in securities holdings in a portfolio, hence avoids the risk of missing any market movement.

Nippon India Nifty SDL Plus G-Sec – Jun 2029 Maturity 70:30 Index Fund

Investment Objective :

The investment objective of the scheme is to provide investment returns corresponding to the total returns of the securities as represented by the Nifty SDL Plus G-Sec Jun 2029 70:30 Index before expenses, subject to tracking errors. However, there can be no assurance or guarantee that the investment objective of the Scheme will be achieved.

Investment Strategy :

Nippon India Nifty SDL Plus G-Sec – Jun 2029 Maturity 70:30 Index Fund is a passively managed Index fund which will employ an investment approach designed to track the performance of Nifty SDL Plus G-Sec Jun 2029 70:30 Index

- Scheme would predominantly invest into State Development Loans (SDLs) and Government Securities (G-Secs) representing Nifty SDL Plus G-Sec Jun 2029 70:30 Index.
- Securities which will form part of the scheme portfolio are expected to have in the aggregate, key characteristics of the underlying index in terms of maturity profile and type of securities.
- Scheme will follow Buy and Hold investment strategy in which existing SDLs & G-Secs will be held till maturity, subject to semi-annual index rebalancing.
- Portfolio will be rolled down in line with the index, hence incremental investment will be in SDLs & G-Secs representing the index.
- In case of maturity of any or all SDLs and G-Secs which are part of the Scheme portfolio, the maturity proceeds will be deployed in the outstanding security of the same issuer having longest maturity or in remaining portfolio in proportion of existing weight or Treasury bills or Tri-Party Repos on Government securities or Treasury bills, till the scheme "Maturity Date".
- Scheme will mature in line with the maturity of the index.

Why Invest in Nippon India Nifty SDL Plus G-Sec – Jun 2029 Maturity 70:30 Index Fund?

- **Relatively Safe** : Index Fund would invest into State Development Loans (SDLs) and Government Securities (G-Secs). Hence, it is relatively safe as compared to Equity and other Debt funds.
- **Opportunity** : Will also allow non demat account holders to seek exposure in passive debt fund via investing in Nippon India Nifty SDL Plus G-Sec – Jun 2029 Maturity 70:30 Index Fund.
- **No lock-in** : Subscribing and redeeming units with mutual fund anytime during the life of the fund.
- **Reduce Risk** : Reduction in non-systematic risk like security selection and portfolio manager selection, as the fund will apply buy & hold strategy and follow the index.
- **Low Cost** : Fund will be managed at low cost[^].

[^] Low cost as compared to active mutual fund schemes in terms of total expense ratio

About Nifty SDL Plus G-Sec Jun 2029 70:30 Index

Overview

Nifty SDL Plus G-Sec Jun 2029 70:30 Index seeks to measure the performance of portfolio of State Development Loans (SDLs) and Government securities (G-Secs) maturing during the twelve month period ending June 29, 2029. The index is computed using the total return methodology including price return and coupon return. The index has a base date of January 30, 2023 and a base value of 1000

Methodology

The methodology is in compliance with the Norms for Debt Exchange Traded Funds (ETFs)/Index Funds announced by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 on May 23, 2022

Index Structure

The index contains 2 components as on the base date of index

1. SDL component: Constituting 70% of the index
2. G-Sec component: Constituting 30% of the index

1. Methodology for SDL component – Constituting 70% of the index

• Eligibility Norms

- SDL should not be a special security

• Issuer Selection

- 20 states/UTs are selected based on the highest total outstanding amount as on January 11, 2023 maturing during the twelve month period ending June 29, 2029

• Security Selection

- As on January 11, 2023, for every selected state/UT, most recently issued SDL maturing during the twelve month period ending June 29, 2029 is selected to be part of the index'. These selected 20 securities will continue to remain in the index till they mature.
- Only one SDL per state/UT to be part of the index

• Weight Assignment

- Each state that is part of the SDL component (constituting 70% of the index) is given equal weight as of the base date of the index
- Subsequently, the security level weights may drift due to price movement and accordingly, the total 70% weight of the SDL component may also drift
- Any coupon amount received is assumed to be reinvested in the portfolio on the same date, in the proportion of the existing weights

2. Methodology for G-Sec component – Constituting 30% of the index

• Eligibility Norms

- G-Sec should not be a special security

• Security Selection

- From the eligible universe, G-Secs with a minimum outstanding amount of Rs. 25,000 crores as on January 11, 2023, maturing during the twelve month period ending June 29, 2029 are selected to be part of the index

Weight Assignment

- Each security that is part of the G-Sec component (constituting 30% of the index) is given equal weight as of the base date of the index
- Subsequently, the security level weights may drift due to price movement and accordingly, the total 30% weight of the G-Sec component may also drift
- Any coupon amount received is assumed to be reinvested in the portfolio on the same date, in the proportion of the existing weights

Index Rebalancing/Reconstitution

- On a semi-annual basis, index will be screened for compliance with the Norms for Debt Exchange Traded Funds (ETFs)/Index Funds announced by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 on May 23, 2022. In case of non-compliance, suitable corrective measures will be taken to ensure compliance with the norms
- During the semi-annual review in the month of June and December of every year, the total weights to the SDL and G-sec components will be reset to the original 70:30 and the underlying security level weights within each component will be also reset to equal weight. Changes, if any, shall be effective from last working day (T) of the June and December month of the respective years
- As the index includes securities that shall mature during the twelve month period ending on the final maturity date of the index, any proceeds from the security redemption prior to the final maturity date of the index shall be re-invested using the following waterfall approach:
 - The proceeds from security redemption will be reinvested in the longest maturity outstanding security issued by the same issuer (SDL in case of state/UT and G-Sec/T-Bill in case of government security) and maturing on or just before the index maturity date with the same weightage. This will be subject to single issuer limit in compliance with the Norms for Debt Exchange Traded Funds (ETFs)/Index Funds announced by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 on May 23, 2022.
 - In case a replacement in the form of outstanding security of the same issuer cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights. This will be subject to single issuer limit in compliance with the Norms for Debt Exchange Traded Funds (ETFs)/Index Funds announced by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 on May 23, 2022
 - In case due to any reason, it is not possible to meet any norms as prescribed by SEBI vide circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated May 23, 2022, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date
 - If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate tracked by Nifty 1D Rate Index for any subsequent days till the maturity of the index

Index Termination

The index shall mature on June 29, 2029.

Risk Factors: Mutual Funds and securities investments are subject to market risks such as trading volumes, settlement risk, liquidity risk and default risk including the possible loss of principal and there is no assurance or guarantee that the objectives of the Scheme will be achieved. As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down. Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme. The present scheme is not a guaranteed or assured return scheme. For more details, refer Scheme Information Document (SID).
