The accompanying financial statements have been prepared and presented under the historical cost convention on the accrual basis of accounting and comply with the Accounting Standards prescribed by the Companies (Accounting Standards) Rules, 2006. The financial statements are presented in Indian Rupees.

2.2 Use of Estimates

2.8 Employee Benefits

Provident Fund

The Company expenses its contribution to the Statutory Provident Fund, a defined contribution scheme, made at 12% of the basic salary of each employee.

Gratuity

The Company's gratuity benefit scheme is a defined benefit plan. The Company's net obligation in respect of the gratuity benefit scheme is calculated by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value, and the fair value of any plan assets, if any, is deducted.

The present value of the obligation under such defined benefit plan is determined based on actuarial valuation using the Projected Unit Credit Method, which recognises each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

The obligation is measured at the present value of the estimated future cash flows. The discount rate is based on the prevailing market yields of Indian government securities as at the balance sheet date for the estimated term of the obligations.

Actuarial gains and losses are recognised immediately in the profit and loss account.

Benefits in respect of gratuity, a defined benefit scheme, and superannuation, a defined contribution scheme, as applicable to employees of the Company are annually funded with the Reliance Life Insurance Company Limited and Birla Sun Life Insurance Company Limited respectively.

Leave Encashment

Leave Encashment which is a defined benefit, is accrued based on an actuarial valuation at the balance sheet date carried out by an independent actuary.

Compensated absences

The employees of the Company are entitled to compensated absence. The employees can carry forward a portion of the unutilized accrued leave balance and utilize it in future periods. The Company records an obligation for compensated absences in the period in which the employee renders the service that increases the entitlement. The Company measures the expected cost of compensated absence as the amount that the Company expects to pay as a result of the unused entitlement that has accumulated at the balance sheet date.

2.9 Initial Issue expenses of schemes

Expenses relating to Initial Issue of Mutual Fund Schemes in excess of the entry load collected, as applicable, are charged to the profit and loss account in the year in which such expenses are incurred.

2.10 Fund expenses

2.12 Tax

Current tax

Income tax expense comprises current tax (i.e. amount of tax for the period determined in accordance with the income tax law), deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the period) and fringe benefit tax. Provision for Income Tax is recognised on an annual basis under the taxes payable method, based estimated tax liability computed after taking credit for allowances and exemption in accordance with Indian Income Tax Act, 1961. In case of matters under appeal due to disallowance or otherwise, full provision is made when the said liabilities are accepted by the Company.

Deferred tax

The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognised using the tax rates that have been enacted or substantively enacted by the balance sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realised in future: however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognised only if there is a virtual certainty of realisation of such assets. Deferred tax assets are reviewed as at each balance sheet date and written down or written up to reflect the amount that is reasonable/virtually certain (as the case may be) to be realised.

Fringe benefit tax (FBT)

The provision for fringe benefit tax is made on the basis of applicable FBT on the taxable value of eligible expenses of the company as prescribed under the Income Tax Act 1961.

2.13 Earnings per share

The basic earnings per share is computed by dividing the net profit attributable to the equity shareholders by weighted average number of equity shares outstanding during the reporting year.

Number of equity shares used in computing diluted earnings per share comprises the weighted average number of shares considered for deriving basic earnings per share and also weighted average number of equity shares which would have been issued on the conversion of all dilutive potential shares. In computing diluted earnings per share only potential equity shares that are dilutive are included.

2.14 Contingencies and provisions

The Company creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.
