About Nifty CPSE Index

About Nifty CPSE Index – Index Methodology

Nifty CPSE Index was constructed in order to facilitate Government of India initiative to disinvest some of its stake in selected CPSEs (Central Public Sector Enterprises) through the ETF route. The index values are to be calculated on free float market capitalization methodology.

The index has base date of 01-Jan-2009 and base value of 1000. Weights of index constituent shall be re-aligned (i.e. capped at 20%) on a quarterly basis and made effective from the last trading day of March, June, September and December.

Selection Criteria: The CPSE's selected meet below mentioned parameters:

- i. Included in the list of CPSEs published by the Department of Public Enterprise
- ii. Listed at National Stock Exchange of India Ltd. (NSE)
- iii. Having more than 51% government holding (stake via Govt. of India or President of India) under promoter category.
- iv. Companies having average free float market capitalization of more than Rs.1000 Cr. for six month period ending December 2019 are selected.
- v. Companies which are IRDA dividend norms compliant shall be considered eligible to be included in the index.

CPSE ETF

About CPSE ETF

Investment Objective: CPSE ETF

The investment objective of the Scheme is to provide returns that, before expenses, closely correspond to the total returns of the Securities as represented by the Nifty CPSE Index, by investing in the Securities which are constituents of the Nifty CPSE Index in the same proportion as in the Index.

Positioning: CPSE ETF

- CPSE ETF is an Exchange Traded Fund (ETF) listed on NSE & BSE, and invests in stocks of Nifty CPSE Index in the same proportion as the underlying Index
- It provides an opportunity to investors for passively investing in a well-expanded portfolio of large CPSE companies, as approximately represented by Nifty CPSE Index

CPSE ETF – Investment Proposition

Power Capex To Drive The Growth Ahead

- **Power capex** is expected to grow the fastest within the traditional infra and industrial segments, as India enters a phase of capex-driven GDP growth, power intensity should rise.
- **Power generation and Transmission & Distribution investments may rise 2.2x** to USD280 billion in FY 2024-2030 vs FY 2017-2023.
- Current thermal **utilisation is close to at all-time high of 80%+** and expected annual thermal capacity additions along with rising transmission capabilities will augur positively for the sector.
- Higher GDP growth and rising household income may lead to higher power demand, additionally, Government plans for making India a manufacturing hub in medium term will **underscore the power demand**.
- The Government machinery, regulators and companies will work together to ensure investments in the sector rise sharply, benefitting the entire landscape.

Power Grid Corporation of India Ltd – FY24 capex ramped up

Industry	Market Cap (Rs. Crs.)	% Weight in ETF
Power	220,610	20.2%

As on December 31, 2023

- Expected visibility on earnings growth trajectory as the company capitalizes on projects aggregating Rs.505 billion over the next few years.
- Target projects aggregating Rs.1.8 trillion by FY2032E including opportunities from the Rs.2.4 trillion of green energy corridors.
- The company has projects of Rs.505 billion in hand, comprising regulated return projects of Rs. 340 billion, Tariff Based Competitive Bidding (TBCB) projects of Rs. 135 billion and smart meter project of Rs. 30 billion.
- Of the Rs. 505 billion of projects in hand, around Rs.207 billion is attributable to the Leh-Ladakh project (5-year execution), while the balance is likely be executed over the next three years.

NTPC Ltd – Improving growth visibility, aggressive capex plans

Industry	Market Cap (Rs. Crs.)	% Weight in ETF
Power	301,712	19.9%

As on December 31, 2023

- The company has around **17 GW (Gigawatt) of under-construction capacity**, comprising 10 GW of coal, and the balance in renewable/ hydro.
- **NTPC expects to add 11.2 GW of thermal capacity beyond FY2026** (tendering in next 12 months), in addition to the existing 10 GW of under-construction thermal capacity (commissioning expected by FY2026).
- Further, the company **expects to increase its renewable capacity to around 20 GW by FY2026, and 60 GW by FY2032** from 3 GW presently.
- NTPC has plans to develop 13-14 GW of pump storage projects.

The above stocks/sector/industry may or may not form part of the scheme in future

Capex – capital expenditure

Source: Internal

NTPC Ltd – Improving growth visibility, aggressive capex plans ...(contd)

- NTPC guided for **capitalization of Rs. 800 billion for 10 GW of conventional capacities and Rs. 850-900 billion for 16 GW of renewable capacities**, the company also plans to spend another Rs. 300 billion for installing Flue Gas Desulfurization (FGD) plants for 60 GW of capacity while targeting 34 million tons of captive coal production in FY2024E (23 million tons in FY2023).
- **Plans to expand its coal mining capacity** - NTPC's subsidiary, NTPC Mining Ltd, won the bid for North Dadu – East (Jharkhand) coal block in the recently concluded coal block auction conducted by the Ministry of Coal. The coal block has 439 million tons of reserves with peak rated capacity of 4 million tons per annum.
- NTPC to incorporate new thermal capacities (3 GW) under construction and has an improved visibility for growth beyond FY2026E in both conventional as well as renewable projects.

Coal India (CIL) – Global tailwinds to support pricing

Industry	Market Cap (Rs. Crs.)	% Weight in ETF
Consumable Fuels	231,719	18.0%

As on December 31, 2023

- Coal India's recent operating performance remains robust –

Key points:

- Supplies to regulated and non-regulated sectors rose 5.8% YoY and 7.4% YoY, respectively;
 - During 8M FY2024, Coal India's subsidiaries - both Bharat Coking Coal Limited (BCCL) and Northern Coalfields Limited (NCL) **achieved their respective progressive production targets**, while South Eastern Coalfields Limited (SECL) accounted for 42% of incremental coal supply;
 - Pithead inventory stands at comfortable 45mt, up 58% YoY;
 - It is expected of achieving **780mt of production** during FY 2024
- CIL is expected to spend Rs. 800 billion as capex over a period of next 5 years, which may enhance its excavation capacities and drive cost synergies.
 - CIL is likely to benefit from both **volume uptick and firm e-auction prices**.

The above stocks/sector/industry may or may not form part of the scheme in future

mt – million tons | YoY- Year on year

Capex – capital expenditure

Source: Internal

Coal India (CIL) – Global tailwinds to support pricing ...(contd)

- **China's thermal coal imports to stay elevated** in the near term owing to domestic production being impacted as a result of mine closures pursuant to safety audits and lower hydro-power generation. As a result, the price of Indonesian coal (4200 kcal/kg) has gone up 17% since Aug'23, to USD 58.94/t.
- Besides, rising cost for Indonesian players may provide support to Indian prices. In its recent result, the largest coal miner in Indonesia, Bumi Resources guided for a cash cost of production at USD 55-60/t in CY23 against FOB realisation of USD 71/t in Q3CY23.
- **E-auction prices have started increasing again** due to above uptick in Indonesian coal prices with unlikely decline in volumes.
- Coal India is well placed to capitalize on the growth opportunities ahead benefiting from long-term commitment with numerous power plant companies. While firm international coal prices is expected to have a trickle-down effect on e-auction prices, resulting in **better profitability**.

The above stocks/sector/industry may or may not form part of the scheme in future

Kcal/kg - kilocalories per kg

Source: Internal

Oil & Natural Gas Corporation Ltd – KG98/2 Oil Production in sight

Industry	Market Cap (Rs. Crs.)	% Weight in ETF
Oil	257,959	16.8%

As on December 31, 2023

- After the introduction of windfall taxes, upstream's net oil realization (post windfall tax, royalty/cess) is limited to around USD 50/bbl. While upstream does not benefit from higher oil prices (rather net realization marginally falls at higher oil prices), the **volatility in realization is lower and earnings visibility better.**
- **Marketing freedom on crude oil is a positive.** The new gas price formula, while not positive from a downstream user's perspective, makes gas prices remunerative for upstream. Upstream is expected to get 20% higher price for Administered Price Mechanism (APM) gas produced from new wells (and well interventions) in nominated fields, which may ensure a gradual uptick in gas realizations

The above stocks/sector/industry may or may not form part of the scheme in future

Bbl – Barrel of crude oil

Source: Internal

Oil & Natural Gas Corporation Ltd – KG98/2 Oil Production in sight ...(contd)

- **Near-term focus is on KG-98/2 production start.** After declines over an extended period, ONGC's oil and gas production is likely to increase in the next few years, driven by the commissioning and ramp-up of production from the long-delayed KG-98/2.
- Oil production is expected to commence in 3Q FY2024, and gas production is likely to ramp up in early 2024. While delays are disappointing, addition of 2.2 mmt oil and 11-12 mmscmd of gas production, over next 1-2 years may reverse the trend of production declines.

The above stocks/sector/industry may or may not form part of the scheme in future

Bharat Electronics Limited (BEL) – Steady order inflow, best among DPSUs

Industry	Market Cap (Rs. Crs.)	% Weight in ETF
Aerospace & Defence	134,646	13.9%

As on December 31, 2023

- BEL has a **37% market share** in Indian defence electronics. Its core capabilities are in radar & weapons systems, defence communication, & electronic warfare.
- **The company has received order inflow of Rs. 39.15 billion pertaining to AMC of –**
 - 1) Radars from Indian Army worth Rs. 5.8 billion; and
 - 2) Airborne Early Warning & Control (AEW&C) system, uncooled TI sights, Software Defined Radios (SDRs), SWIR payload, IACCs and Passive Night Vision Binoculars etc.
- These are recurring orders which may be **executed within the next 12-15 months**. Furthermore, the Artificial Magnetic Conductor (AMC) of radars is likely to have participation from the sub-vendors of BEL.

The above stocks/sector/industry may or may not form part of the scheme in future

DPSUs – Defence PSUs

Source: Internal

Bharat Electronics Limited (BEL) – Steady order inflow, best among DPSUs ...(contd)

- BEL has targeted a **capex of ~Rs. 8 billion** for FY24, during H1 FY2024 capex was around Rs. 2.5 billion.
- **These fresh orders take the total order inflow for FY2024 (thus far) at Rs. 183 billion**, the highest among all Defence PSUs (DPSUs). The execution in H2 FY2024e may be boosted by the strong order funnel already in place.
- BEL enjoys the benefits of being present in various platforms across services, reducing the risk of budgetary allocation. Further, the company continues to report an impressive order inflow, certainty leading to the execution.
