India Strategy : A year of Ups and Downs

- In CY23, the Indian markets remained resilient and strong amid weak global macros, rising interest rates, and geopolitical uncertainties that kept global markets volatile and jittery.
- The Nifty-50 clocked eight successive years of positive returns. The benchmark index hit an all-time high in Dec'23 and surged 20% YoY in CY23 (vs. only 4% growth in CY22). While multi-year high interest rates, geopolitical tensions, volatility in crude oil prices, slowing growth, and recessionary environment in developed markets remained the key concerns during the year, India's healthy economic growth, healthy corporate earnings, moderate inflation, waning crude oil prices, reinforced Foreign institutional investors (FII) and Domestic institutional investors (DII) inflows, and good retail participation propelled the Indian markets to greater heights

Eight years of positive returns for Nifty50

India remains the second-best performer in the last 10 years...

India's market capitalization-to-GDP ratio at an all-time high as of year-end closing

- India's market capitalization-to-GDP ratio continues to remain strong. The ratio stands at 132% as of FY24, much above its long term average of ~80%.
- India's Real GDP growth came in much higher than expected at 8.4% in 3QFY24 vs. 8.1% (revised higher from 7.6%) in 2QFY24 and 4.3% in 3QFY23 (revised lower from 4.8%). 1QFY24 GDP growth has also been revised higher to 8.2% from 7.8%. Consequently, GDP growth for 9MFY24 stood at 8.2%. Higher-than-expected GDP growth was partly led by a downward revision in 3QFY23 growth (to 4.3% from 4.8% earlier) and a very high growth in real net indirect taxes, driven by lower subsidies.

Market capitalization-to-GDP ratio (%)

Healthy market returns seen three months prior to the general election results

- Market performance has remained healthy three months prior to the Lok Sabha election results
- The performance was strong in the past three out of four general elections.

Indices' returns YoY (%)

Note: - Indices returns are considered three months prior to the Lok Sabha Election results declaration date
- 2024 LS election date is 4th June 2024. Past performance may or may not be sustained in the future.

Mid and small cap rally takes a pause in Mar'24

- After a sharp rally in the past one year, mid and small caps underperformed large caps in Mar'24
- While mid caps recovered after the sharp fall and ended flat during the month, small caps declined 5% MoM
- Market cap of large/mid/small cap companies was +40%/+63%/+83% during Apr'23-Feb'24, while the same was +1%/+0.1%/-5.1% MoM in Mar'24

Market cap contribution (%)

The top 100, 101 to 250, 251 onwards are in terms of market capitalizations

Small and micro caps witness a sharp correction from their recent highs

- Market cap for small cap and micro cap companies declined 10% and 8%, respectively, from their Mar'24 highs
- Market cap for large/mid/small/micro cap indices rose 31%/57%/80%/70% YoY in FY24.

- Stocks that are falling outside the top 500 in terms of market capitalization are usually referred to as microcap stocks. Typically, these enterprises have a market cap of under Rs 5,000 crore.

Note - Large caps – Nifty 50 index (peaked on 7th Mar'24) | Mid caps - Nifty Midcap 100 index (peaked on 8th Feb'24) Small caps - Nifty Smallcap 100 index (peaked on 7th Feb'24) | Micro caps - Nifty Smallcap 250 index (peaked on 7th Feb'24). Past Performance may or may not sustain in the future.

Equity View March 2024 and Outlook

- Indian economy continues to remain robust supported by demographic tailwinds, policy and structural reforms. Key lead indicators like tax collections, industrial activity, power demand continues to be buoyant.
- Moderating inflation, pick up in the private sector capex are also positive drivers. India is emerging to be destination of choice for global investors given the favorable macros, expectations of policy continuity etc. and we may see increased inflows.
- While the larger construct looks positive in India, valuations continue to remain elevated at a broad level with some exceptions like Large Banks, select utilities, commodities etc.
- Going forward the sentiment appears to be buoyant supported by India's relatively better macros, earnings outlook for India remains strong relative to emerging markets, driven by healthy credit demand and robust high-end consumption demand, possibility of higher foreign flows and the narrative around policy continuity in the upcoming general elections.
- We believe Large Cap oriented strategies across Large Cap and Flexi/Multi Cap categories appear to be better placed on a risk- reward basis while Asset allocation products can help to manage the downside risks.
- Asset allocation in line with investment goals and risk appetite is important for better risk – return optimization. Herein asset allocation funds can help in lowering volatility and provide better balance to the overall portfolio mix.

Nippon India Flexi Cap Fund

(An open ended dynamic equity scheme investing across large cap, mid cap, small cap stocks.)

This product is suitable for investors who are seeking*:	Nippon India Flexi Cap Fund	Nifty 500 TRI
<ul style="list-style-type: none"> • Long term capital growth • Investment in equity and equity related securities 	 <p>Riskometer Investors understand that their principal will be at Very High Risk</p>	 <p>Riskometer Benchmark Riskometer is at Very High Risk</p>

Nippon India Flexi Cap Fund - Investment Framework

- The fund will create a portfolio of companies across market caps. Unique way of selection of companies picked up across the breadth of the market
- The fund's ability of not constraint by a single factor like “market cap” which says nothing about the capability or return generation ability of the company
- It is a well diversified fund which will invest across sectors
- Stock concentration is controlled

Note: The current fund strategy may change in future depending on market conditions or fund manager's views.

Four Pillars of Nippon India Flexi Cap Strategy

Revenue Leadership
in Structural
Businesses
Cost Leadership in
Cyclical Businesses

Disproportionate share of profit pool
Ability to invest and be ahead is higher
Higher longevity of business and growth
Ability to remain relevant and survive downcycles

Business
Innovators
& Disruptors

- Companies ahead in changing business trends
- Have innovative products or processes
- Disrupting the legacy business

Good Assets at
Bad Times

- Identify business cycle and invest at the bottom of the cycle
- Look away from what the Company is currently doing & Focus on the long term growth potential.

Value arbitrages
across Market
Capitalization

- Not constrained by Market caps
- The valuation arbitrages

Nippon India Flexi Cap Fund – Fund Casing

Scheme Name	Nippon India Flexi Cap Fund
Market Cap Bias	Largecap deviation maximum 50% of Largecap weight in benchmark
Style	Style-diversified
Maximum Sector Deviation from Benchmark	Financials – Max deviation of 8% from the benchmark
Maximum Stock Deviation from Benchmark	Max deviation of 40% for each of the Top 5 stocks by weight in the Benchmark
Single Stock Concentration	NA
Cumulative Stock Concentration	Cumulative exposure of Max 45% in C and 5% in D rated stocks
Active Share	50 – 70
Cash call	NA

Note: 1) Active share is the percentage of fund holdings that is different from the benchmark holdings. 2) Based on Internal assessment of Business Risk, stocks have been classified under four rating buckets: A,B,C,D with A being the best and D being the worst. While it may appear all the investments should be concentrated in the A or B bucket, the stocks may not be reasonably priced. At the same time, stocks rated C or D may offer opportunities at reasonable valuations.

Data as on 31st March'2024.

Current Positioning and Rationale

- Well capitalized balance sheets, comfortable asset quality and valuations may make large banks an attractive space
- With rapidly advancing technologies, rising consumer expectations and incomes the industry is on the cusp of substantial change. Overweight on Financials within which Corporate Banks and Microfinance are overweight
- After decades of decline, India's consumer basket is rapidly changing with a rise in higher income households and shift from standard to premium categories through products and services.
- Industrials and infrastructure continue to have a positive impact led by robust order inflow and benign commodity prices
- Underweight IT considering global growth concerns
