**Past performance may or may not be sustained in future** and the same may not necessarily provide the basis for comparison with other investment.

## Predicting Asset class behavior is extremely difficult

Market commentaries keep changing!

Even the Best of Minds fail to capture the Asset class trends

For instance – Market Experts were extremely pessimistic in Mar'20 and expected a deep correction in Markets. However, by Dec'20 markets were hovering near their record highs and Experts are very optimistic now

**Source:** Bloomberg, NYTimes, The Guardian, Live Mint, Business Standard, CNBC TV18, Barron's, Times Now, MarketWatch & CNN

## Challenges in Navigating from one Asset class to another

Key Fundamentals driving returns for Equity are quintessentially very different from drivers of Gold and Debt

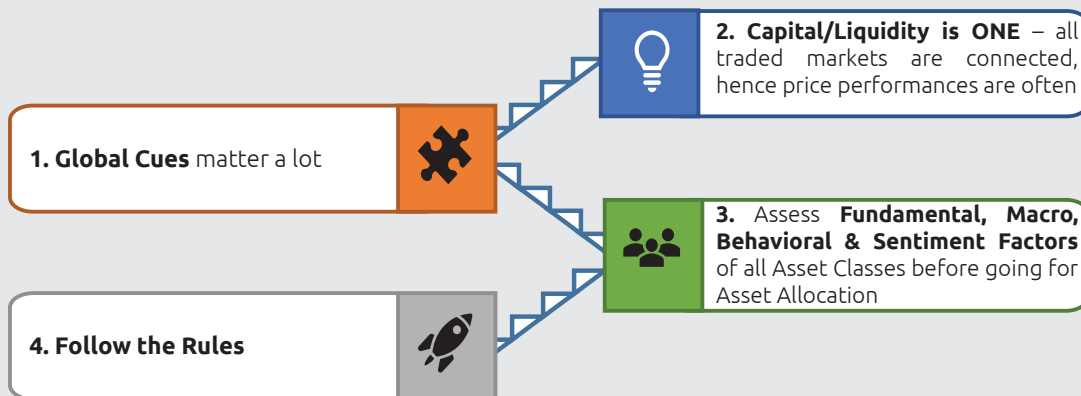

Hence extent to which valuations/yields could guide is quite limited

Capturing the structural shifts, Tops and Bottoms of a cycle for the asset classes is easier said than done

Though its difficult to predict Individual Asset class trends. But, dynamic asset allocation may lead to better risk-adjusted returns

So, how do you navigate and benefit from the cycles?

## What we Believe
